Index

Preface

- Purpose
- Audience
 This document is intended for the following audience:
- Access to Support
- Critical Patches
- Structure This manual is organized into the following chapters:
- Diversity and Inclusion
- Conventions
- Related Documents
- Screenshot Disclaimer
- Acronyms and Abbreviations
- Basic Actions
- Symbols and Icons

Purpose

This manual is designed to help you quickly get acquainted with the Oracle Banking Trade Finance Process Management **Import LC Closure** process.

Audience

This document is intended for the following audience:

- Oracle Implementers
- Customer Service Representatives (CSRs)
- Oracle user

Access to Support

Oracle welcomes customers' comments and suggestions on the quality and usefulness of the document. Your feedback is important to us. If you have a query that is not covered in this user guide or if you still need assistance, please contact documentation team.

Access to Oracle Support

Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

Critical Patches

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at Critical Patches, Security Alerts and Bulletins. All critical patches should be applied in a timely manner to ensure effective security, as strongly recommended by Oracle Software Security Assurance.

Structure

This manual is organized into the following chapters:

- Preface gives information on the intended audience, structure, and related documents for this User Manual.
- The subsequent chapters provide an overview to the module.

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Conventions

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text.
italic	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

The following text conventions are used in this document:

Related Documents

For more information on any related features, you can refer to the following documents:

- Getting Started User Guide
- Oracle Banking Common Core User Guide

Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

Acronyms and Abbreviations

The list of the acronyms and abbreviations that are used in this guide are as follows:

Abbreviation	Description
OBTFPM	Oracle Banking Trade Finance Process Management
LC	Letter of Credit
BC	Bankers Cheque
FX	Foreign Exchange
CCY	Currency
LCY	Local Currency
FCY	Foreign Currency
LOV	List of Values
CIF	Customer Information File
UDF	User Defined Fields
FFT	Free Format Text
SBLC	Standby Letter of Credit

Table 1 Acronyms and Abbreviations

Basic Actions

Most of the screens contain Action Buttons to perform all or a few of the basic actions. The actions which are called here are generic, and it varies based on the usage and the applicability. The table below gives a snapshot of them:

Table 2	Common Action Buttons and its Definitions
---------	--

Action Buttons	Description
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system.
	Reject Codes are:
	 R1- Documents missing R2- Signature Missing R3- Input Error R4- Insufficient Balance/Limits R5 - Others
	Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.

Action Buttons	Description	
Refer	Select a Refer Reason from the values displayed by the system.	
	Refer Codes are:	
	R1- Documents missing	
	R2- Signature Missing	
	R3- Input Error	
	R4- Insufficient Balance/Limits	
	R5 - Others	
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task.	
	This option is used, if there are any pending information yet to be received from applicant.	
Cancel	Click Cancel to cancel the transaction input midway without saving any data.	
Save & Close	Click Save & Close to save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.	
Next	Click Next , system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.	
Submit	Click Submit to complete the transaction after you specify all the input parameters for a particular process. The task will get moved to next logical stage of the process. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.

Oracle Banking Trade Finance Process Management

This topic helps you quickly get acquainted with the Oracle Banking Trade Finance Process Management process.

Welcome to the Oracle Banking Trade Finance Process Management User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

Overview

Oracle Banking Trade Finance Process Management is a Trade Finance middle office platform, which enables bank to streamline the Trade Finance operations. Oracle Banking Trade Finance Process Management enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels). **Benefits**

Oracle Banking Trade Finance Process Management helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

2 Import LC Closure

This process illustrates the update to an Import LC Closure handled in Oracle Banking Trade Finance Process Management (OBTFPM).

This process allows the user to register a request for an Import LC Closure received at desk.

This topic contains following subtopics:

- Common Initiation Stage This topic provides the systematic instructions to initiate the new Import LC Closure request.
- Registration

This topic provides the systematic instructions to initiate the **Registration** stage of **Import LC Closure** request.

- Data Enrichment
 This topic provides the systematic instructions to initiate the Data Enrichment stage of
 import LC Closure request.
- Multi Level Approval This topic helps you quickly get acquainted with the Multi Level Approval process.
- Reject Approval This topic helps you quickly get acquainted with the Reject Approval process.

2.1 Common Initiation Stage

This topic provides the systematic instructions to initiate the new Import LC Closure request.

Specify User ID and Password, and login to Home screen.

 On Home screen, click Trade Finance. Under Trade Finance, click Initiate Task. The Initiate Task screen appears.

Field	Description
View LC	Click to view the latest LC values displayed in the respective fields.
View LC Events	Click to view the details of LC events.
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.
Cancel	Cancels the Import LC Closure task. Details entered will not be saved and the task will be removed.
Save & Close	Save the information provided and holds the task in 'My Task' queue for working later. This option will not submit the request.
Submit	Click Submit, task will get moved to next logical stage of Import LC Closure. If mandatory fields have not been captured, system will display an error message until the mandatory fields data are provided.
Checklist	Click to view the list of items that needs to be completed and acknowledge. If mandatory checklist items are not selected, system will display an error on submit. The checklist items under Registration Stage are: Application signed and stamped Customer signature verified Any correction or alteration initialed by the applicant.

Table 2-5 (Cont.) Registration - Action Buttons - Field Description

Document Linkage

This topic provides the systematic instructions to initiate the document linkage.

2.2.1 Document Linkage

This topic provides the systematic instructions to initiate the document linkage.

In OBTFPM, system should display Document Ids available in the DMS system. In DMS system, the documents can be Uploaded and stored for future access. Every document stored in DMS will have a unique document id along with other Metadata. The uploaded Document image in the DMS should be available/queried in the Process flow stage screens to link with the task by using the Document ID.

System displays the Documents ids which is not linked with any of the task. Mid office should allow either upload the document or link the document during task processing. The Mid office should allow to Link the same Document in multiple tasks.

Specify User ID and Password, and navigate to Registration screen.

1. On the header of **Registration** screen, click, **Documents**.

Document Status Select All	•

Let's look at the details for Data Enrichment stage. User can enter/update the following fields.

Do the following steps to acquire a task at Data Enrichment stage. The Data Enrichment stage has the following hops for data capture:

Main Details

This topic provides the systematic instructions to initiate the Data Enrichment stage of import LC Closure request.

- Additional Fields This topic provides the systematic instructions to capture the additional fields.
- Advices

This topic provides the systematic instructions to capture the advices details.

Additional Details

This topic provides the systematic instructions to capture the additional details.

Settlement Details

This topic provides the systematic instructions to capture the settlement details of import LC Closure request.

Summary

This topic provides the systematic instructions to view the summary of **Import LC Closure** request.

2.3.1 Main Details

This topic provides the systematic instructions to initiate the Data Enrichment stage of import LC Closure request.

Main details section has two sub section as follows:

- Application Details
- LC Details.

Application Details

All fields displayed under main details section, would be same as Registration stage. For more information on fields, refer 'Application Details' section of **Registration** stage.

1. On **Data Enrichment - Main Details** screen, specify the fields that were not entered at Registration stage.

2. Click Next.

The task will move to next data segment.

Field	Description
Documents	Click to View/Upload the required document.
	Application displays the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application.
Remarks	Specify any additional information regarding the LC Closure. This information can be viewed by other users processing the request.
	Content from Remarks field should be handed off to Remarks field in Backend application.
Overrides	Click to view the various overrides that have been generated and accepted.
Customer Instruction	 Click to view/ input the following Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. Transaction Level Instructions – In this section, OBTFPM use can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.
Signatures	Click the Signature button to verify the signature of the customer/ bank if required. The user can view the Customer Number and Name of the signatory Signature image and the applicable operation instructions if any available in the back-office system. If more than one signature is available, system should display all the signatures.
View LC	Click to view the latest LC summary with the latest LC details values
View LC Events	Click to view the LC Events.
Reject	 On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes are: R1- Documents missing R2- Signature Missing R3- Input Error R4- Insufficient Balance/Limits R5 - Others Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window

 Table 2-7
 Main Details - Action Buttons - Field Description

Field	Description
Commission Details	The commission details. All charges, commission and margin are collected from the counter- party by default.
Component	This field displays the commission component.
Rate	This field displays the rate that is defaulted from product. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate.
	If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.
Mod. Rate	From the default value, if the rate is changed the value gets updated in this field.
Currency	This field displays the currency in which the commission have to be collected.

Field	Description
Amount	This field displays the amount that is maintained under the product code.
	The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate, but not the commission amount directly. The amount gets modified based on the rate changed and the new amount is calculated in back office based on the new rate and is populated in OBTFPM.
	If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field.
Modified	From the default value, if the amount is changed, the value gets updated in the modified amount field.
Defer	If enabled, charges/commissions has to be deferred and collected at any future step.
Waive	Based on the customer maintenance, the charges/commission can be marked for Billing or Defer. If the defaulted Commission is changed to defer or billing or waive, system must capture the user details and the modification details in the 'Remarks' place holder.
Charge Party	Charge party is 'Applicant' by default. User can change the value to Beneficiary.
Settl. Account	The settlement account.
Amendable	Displays if the field is amendable or not.
Charge Details	Displays the charge details.
Component	This field displays the charge component type.
Tag Currency	This field displays the tag currency in which the charges have to be collected.
Tag Amount	This field displays the tag amount that is maintained under the product code.
Currency	This field displays the currency in which the charges have to be collected.
Amount	This field displays the amount that is maintained under the product code.
Modified	From the default value, if the rate is changed or the amount is changed, the value gets updated in the modified amount field.
Billing	If charges are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically enabled in OBTFPM.
	The user can not enable/disable the option, if it is de-selected by default.

Field	Description
Defer	If charges have to be deferred and collected at any future step, this check box has to be selected. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPM.
	The user can enable/disable the option the check box. On de- selection the user has to click on 'Recalculate' charges button for re- simulation.
Waive	Enble the toggle, if charges has to be waived. Based on the customer maintenance, the charges should be marked for Billing or for Defer.
	This field is disabled, if Defer toggle is enabled.
Charge Party	Charge party is applicant by default. User can change the value to beneficiary.
Settlement Account	The settlement account.
Tax Details	Displays the tax details. The tax component is calculated based on the commission and defaults if maintained at product level. User cannot update tax details and any change in tax amount on account of modification of charges/ commission will be available on click of Re-Calculate button or on hand off to back-end system.
Component	This field displays the tax component.
Туре	This field displays the type of tax component.
Value Date	This field displays the value date of tax component.
Ссу	This field displays the currency in which the tax have to be collected. The tax currency is the same as the commission.
Amount	This field displays the tax amount based on the percentage of commission maintained. You can edit the tax amount, if applicable.
Billing	If taxes are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing. This field is disabled, if 'Defer' toggle is enabled.
Defer	If taxes have to be deferred and collected at any future step, this option has to be enabled. The user can enable/disable the option the check box. On deselection the user has to click on 'Recalculate' charges button for resimulation.
Settl. Account	System defaults the settlement account. The user can modify the settlement account.

Field	Description
Preview SWIFT Message	Displays the preview of SWIFT Messages.
Language	Read only field. The language to preview the draft guarantee details. English is set as default language for the preview.
Message Type	Select the message type from the drop-down.
Message Status	Read only field. Displays the message status of the draft message.
Repair Reason	Read only field. Displays the reason of repair.
Preview Message	This field displays a preview of the draft message. Based on the guarantee text captured in the previous screen, guarantee draft is generated in the back office and is displayed in this screen.
Preview Mail Device	Based on the guarantee amendment captured in the previous screen, the preview message-mail advice is simulated from the back office and the user can view the message.
Language	Read only field. The language for the advice message. English is set as default language for the preview.
Advice Type	Select the advice type.
Message Status	Read only field. Displays the message status of the mail advice.
Repair Reason	Read only field. Displays the reason of repair.
Preview Message	This field displays a preview of advice.

- 7. Click **Save and Close** to save the details and close the screen.
- 8. Click Next.

The task will move to next data segment.

For more information on action buttons, refer to the field description table below.

Field	Description
Documents	Click to View/Upload the required document.
	Application displays the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application
Remarks	Specify any additional information regarding the LC Closure. This information can be viewed by other users processing the request.
	Content from Remarks field should be handed off to Remarks field in Backend application.
Overrides	Click to view the overrides accepted by the user.
Customer Instruction	 Click to view/ input the following Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions.
Signatures	Click the Signature button to verify the signature of the customer/ bank if required. The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system. If more than one signature is available, system should display all the signatures.
Reject	 On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes are: R1- Documents missing R2- Signature Missing R3- Input Error R4- Insufficient Balance/Limits R5 - Others Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.

Field	Description
Refer	Select a Refer Reason from the values displayed by the system.
	Refer Codes are:
	R1- Documents missing
	R2- Signature Missing
	R3- Input Error
	R4- Insufficient Balance/Limits
	R5 - Others
Hold	The details provided will be saved and status will be on hold.User must update the remarks on the reason for holding the task.
	This option is used, if there are any pending information yet to be received from applicant.
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.
Back	Click Back to move to the previous screen of Data Enrichment stage.
Next	On click of Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment.

Table 2-16 (Cont.) Additional Details - Action Buttons - Field Description

2.3.5 Settlement Details

This topic provides the systematic instructions to capture the settlement details of import LC Closure request.

System should simulate the settlement details from back office and display the same in this screen.

Table 2-20 (Cont.) Summary - Action Buttons - Field Description

On submit of DE Stage, if Limits Earmark or Amount block fails, system should park the task in Limit Exception stage or Amount Block exception stage as required.

2.4 Multi Level Approval

This topic helps you quickly get acquainted with the Multi Level Approval process.

The Approval user can approve a Import LC Closure transaction.

- 1. Log in into OBTFPM application and on Home screen, click, Task.
- 2. Under Task, click Free Task.
- Select the appropriate task and click Acquire & Edit to edit the task or click Acquire to edit the task from My Tasks.
- 4. The acquired task will be available in My Tasks tab. Click Edit to approve the task.

The Approval Re-Key pop-up screen appears.

Figure 2-18 Approval Re-Key

	ΨΛ	View Signature	Document
Currency			
GBP			• Ø
Contract Amo	ount		
GBP	•	£10	0.00

For non online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

5. Open the task and re-key some of the critical field values from the request in the **Approval Re-Key** screen.

Some of the fields below will dynamically be available for re-key.:

Currency

Contract Amount

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.

6. Click **Proceed** to proceed for the approval.

The **Approval Summary** screen appears. The user can view the Summary tiles which displays list of important fields with values.

7. Click each tile to drill down from summary tiles into respective data segments to verify the details of all fields under the data segment.

Note:

The user can simulate/recalculate charge details and during calling the handoff, if handoff is failed with error the OBTFM displays the Handoff failure error during the Approval of the task.
