Preface

- Purpose
- Audience This document is intended for the following audience:
- Documentation Accessibility
- Critical Patches
- Diversity and Inclusion
- Structure This manual is organized into the following chapters:
- Conventions
- Related Documents
- Screenshot Disclaimer
- Basic Actions
- Symbols and Icons

Purpose

This manual is designed to help you quickly get acquainted with the Oracle Banking Trade Finance Process Management **Shipping Guarantee Issuance - Islamic** process.

Audience

This document is intended for the following audience:

- Oracle Implementers
- Customer Service Representatives (CSRs)
- Oracle user

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc.

Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

Critical Patches

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at Critical Patches, Security Alerts and Bulletins. All critical patches should be applied in a timely manner to ensure effective security, as strongly recommended by Oracle Software Security Assurance.

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Structure

This manual is organized into the following chapters:

- Preface: Preface gives information on the intended audience, structure, and related documents for this User Manual.
- Chapters: The subsequent chapters provide an overview to the module.
- Screen Shot Disclaimer The images of screens used in this user manual are for illustrative purpose only, to provide improved understanding of the functionality; information used in the interface or documents are dummy, it does not exist in real world, and its only for reference purpose.

Conventions

The following text conventions are used in this document:

| Convention | Meaning |
|------------|--|
| boldface | Boldface type indicates graphical user interface elements associated with an action, or terms defined in text. |
| italic | Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values. |
| monospace | Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter. |

Related Documents

For more information on any related features, you can refer to the following documents:

- Getting Started User Guide
- Oracle Banking Common Core User Guide

Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

Oracle Banking Trade Finance Process Management

This topic helps you quickly get acquainted with the Oracle Banking Trade Finance Process Management process.

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing Trade Finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

Overview

OBTFPM is a Trade Finance middle office platform, which enables bank to streamline the Trade Finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels). **Benefits**

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

2 Shipping Guarantee Issuance - Islamic

This User Manual describes the various stages of Shipping Guarantee Issuance - Islamic process.

As part of Shipping Guarantee Issuance, the Importer (Applicant in case of LC transaction and Drawee in case of Documentary Collection) approaches a bank and requests the bank to issue a Shipping Guarantee and the Shipping guarantee is presented by the Importer to the carrier for taking delivery of the goods in the case of arrival of cargo prior to the shipping document.

The various stages involved for issuance of Shipping Guarantees are:

- Input application details and Upload of related mandatory and non-mandatory documents in Registration stage.
- Input/Modify details of Shipping Guarantee Data Enrichment stage
- Check for limit availability
- Check balance availability for amount block
- Check for sanctions & KYC status
- Earmark limits/Create amount block for cash margin/charges
- Capture remarks for other users to check and act Generate acknowledgements
- Hand off request to back office

The design, development and functionality of the Islamic Shipping Guarantee Issuance process flow is similar to that of conventional Shipping Guarantee issuance process flow.

In the subsequent sections, let's look at the details for Shipping Guarantee Issuance process.

This topic contains following subtopics:

- Common Initiation Stage
- Registration
- Data Enrichment
- Exceptions
- Multi Level Approval
- Common Initiation Stage
 This topic provides the systematic instructions to initiate the new Shipping Guarantee
 Issuance Islamic request.
- Registration

This topic provides the systematic instructions to initiate the Registration stage of Shipping Guarantee Issuance - Islamic request.

- Data Enrichment
 This topic provides the systematic instructions to initiate the Data Enrichment stage of Shipping Guarantee Issuance - Islamic request.
- Exceptions

This topic helps you quickly get acquainted with the Exceptions process.

Figure 2-6 My Task

The Data Enrichment stage has the following hops for data capture:

- Main Details
- Shipment Details
- Additional Fields
- Advices
- Additional Details
- Settlement Details
- Summary

Let's look at the details for Data Enrichment stage. User can enter/update the following fields as part of Shipping Guarantee Issuance - Islamic - Data Enrichment Stage.

Main Details

This topic provides the systematic instructions to initiate the main details of Data Enrichment stage of Shipping Guarantee Issuance - Islamic request.

• Shipment Details

This topic provides the systematic instructions to capture the shipment details of Shipping Guarantee Issuance - Islamic request.

- Additional Fields This topic provides the systematic instructions to capture the additional fields.
- Advices

This topic provides the systematic instructions to capture the advices details of Shipping Guarantee Issuance - Islamic process.

Additional Details

This topic provides the systematic instructions to capture the additional details in Data Enrichment stage of Shipping Guarantee Issuance - Islamic process.

• Settlement Details

This topic provides the systematic instructions to capture the settlement details of Shipping Guarantee Issuance - Islamic request.

Summary

This topic provides the systematic instructions to view the summary details in Data Enrichment stage of Shipping Guarantee Issuance - Islamic process.

2.3.1 Main Details

This topic provides the systematic instructions to initiate the main details of Data Enrichment stage of Shipping Guarantee Issuance - Islamic request.

Main details section has two sub section as follows:

- Application Details
- Shipping Guarantee Details.

Application Details

Applications from Online channels will be directly available in the Data Enrichment stage and the fields will be populated with the details from incoming request.

1. On **Data Enrichment - Main** screen, specify the fields that were not entered at Registration stage.

2. Click Next.

The task will move to next data segment. For more information refer Shipment Details.
| Field | Description |
|-----------------------|---|
| Clarification Details | Clicking the button opens a detailed screen, user can see the clarification details in the window and the status will be 'Clarification Requested'. |
| Documents | Click to View/Upload the required document. |
| | Application displays the mandatory and optional documents. The user can view and input/view application details simultaneously. When a user clicks on the uploaded document, Document window get opened and on clicking the view icon of the uploaded document, Application screen should get split into two. The one side of the document allows to view and on the other side allows to input/view the details in the application. |
| Remarks | Specify any additional information regarding the Guarantee Issuance Claim Settlement. This information can be viewed by other users processing the request. |
| | Content from Remarks field should be handed off to Remarks field in Backend application. |
| Overrides | Click to view the overrides accepted by the user. |
| Customer Instruction | Click to view/ input the following Standard Instructions – In this section, the system will populate the details of Standard Instructions maintained for the customer. User will not be able to edit this. Transaction Level Instructions – In this section, OBTFPM user can input any Customer Instructions received as part of transaction processing. This section will be enabled only for customer initiated transactions. |
| Signatures | Click the Signature button to verify the signature of the customer/ bank if required. The user can view the Customer Number and Name of the signatory, Signature image and the applicable operation instructions if any available in the back-office system. If more than one signature is required, system should display all the |
| | signatures |
| Request Clarification | Clicking this button allows the user to submit the request for clarification to the "Trade Finance Portal" for the transactions that are initiated offline. |
| Reject | On click of Reject, user must select a Reject Reason from a list displayed by the system. |
| | Reject Codes are: R1- Documents missing R2- Signature Missing R3- Input Error R4- Insufficient Balance/Limits R5 - Others Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process. |

Table 2-9 Main Details - Action Buttons - Field Description

| Field | Description | | |
|--------------|--|--|--|
| Refer | Select a Refer Reason from the values displayed by the system. | | |
| | Refer Codes are: | | |
| | R1- Documents missing | | |
| | R2- Signature Missing | | |
| | R3- Input Error | | |
| | R4- Insufficient Balance/Limits R5 - Others | | |
| Hold | The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. | | |
| | This option is used, if there are any pending information yet to be received from applicant. | | |
| Cancel | Cancel the Scrutiny stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue. | | |
| Save & Close | Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request. | | |
| Next | On click of Next, system validates if all the mandatory fields have been captured. Necessary error and override messages to be displayed. On successful validation, system moves the task to the next data segment. | | |

Table 2-9 (Cont.) Main Details - Action Buttons - Field Description

For more information on fields, refer to the field description table below.

Table 2-16 Charge Details - Field Description

| Field | Description | | | |
|--------------------|--|--|--|--|
| Commission Details | This section displays the commission details. All charges, commission and margin are collected from the counter- party by default. | | | |
| Component | This field displays the commission component. | | | |
| Rate | This field displays the rate that is defaulted from product. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate. | | | |
| | If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field. | | | |
| Modified Rate | From the default value, if the rate is changed the value gets updated in this field. | | | |
| Currency | This field displays the currency in which the commission have to be collected. | | | |
| Amount | This field displays the amount that is maintained under the product code. The commission rate, if available in Back Office defaults in OBTFPM. The user is able to change the rate, but not the commission amount directly. The amount gets modified based on the rate changed and the new amount is calculated in back office based on the new rate and is populated in OBTFPM. | | | |
| | If flat commission is applicable, then commission amount defaulted from back office is modifiable by the user. Rate field will be blank and the user cannot modify the Rate field. | | | |
| Modified Amount | From the default value, if the amount is changed, the value gets updated in the modified amount field. | | | |

| Field | Description | | | | | |
|--------------------|--|--|--|--|--|--|
| Defer | If enabled, charges/commissions has to be deferred and collected at any future step. | | | | | |
| Waive | Based on the customer maintenance, the charges/commission can be marked for Billing or Defer. If the defaulted Commission is changed to defer or billing or waive, system must capture the user details and the modification details in the 'Remarks' place holder. | | | | | |
| Charge Party | Charge party is 'Applicant' by default. User can change the value to Beneficiary. | | | | | |
| Settlement Account | Select the settlement account. | | | | | |
| Amendable | Displays if the field is amendable or not. | | | | | |
| Charge Details | This section displays the Charge Details. | | | | | |
| Component | This field displays the charge component type. | | | | | |
| Tag Currency | This field displays the tag currency in which the charges have to be collected. | | | | | |
| Tag Amount | This field displays the tag amount that is maintained under the product code. | | | | | |
| Currency | This field displays the currency in which the charges have to be collected. | | | | | |
| Amount | This field displays the amount that is maintained under the product code. | | | | | |
| Modified | From the default value, if the rate is changed or the amount is changed, the value gets updated in the modified amount field. | | | | | |
| Billing | If charges are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is 'Billing' enabled, 'Billing' toggle for that component should be automatically enabled in OBTFPM. The user can not enable/disable the option, if it is de-selected by default. This field is disabled, if 'Defer' toggle is enabled. | | | | | |
| Defer | If charges have to be deferred and collected at any future step, this check box has to be selected. On simulation of charges/commission from Back Office, if any of the Charges/Commission component for the customer is AR-AP tracking enabled, 'Defer' toggle for that component should be automatically checked in OBTFPM. The user can enable/disable the option the check box. On de- selection the user has to click on 'Recalculate' charges button for re- simulation. | | | | | |
| Waive | Enble the toggle, if charges has to be waived. Based on the customer maintenance, the charges should be marked for Billing or for Defer. This field is disabled, if Defer toggle is enabled. | | | | | |
| Charge Party | Charge party is applicant by default. User can change the value to beneficiary. | | | | | |
| Settlement Account | Select the settlement account. | | | | | |

 Table 2-16
 (Cont.) Charge Details - Field Description

| Field | Description |
|--------------------|--|
| Tax Details | Displays the tax details. The tax component is calculated based on the commission and defaults if maintained at product level. User cannot update tax details and any change in tax amount on account of modification of charges/ commission will be available on click of Re-Calculate button or on hand off to back-end system. |
| Component | This field displays the tax component. |
| Туре | This field displays the type of tax component. |
| Value Date | This field displays the value date of tax component. |
| Currency | This field displays the currency in which the tax have to be collected. The tax currency is the same as the commission. |
| Amount | This field displays the tax amount based on the percentage of commission maintained. You can edit the tax amount, if applicable. |
| Billing | If taxes are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing. This field is disabled, if 'Defer' toggle is enabled. |

| | error message until the mandatory fields data are provided. n case of duplicate documents' system will terminate the process after handing off the details to back office. | | | | |

2.4 Exceptions

This topic helps you quickly get acquainted with the Exceptions process.

The Islamic Shipping Guarantee Issuance request, before it reaches the approval stage, the application will validate the Amount Block, KYC and AML. If any of these failed in validation will reach exception stage for further clearance for the exceptions.

Amount Block Exception Approval

User can review the amount block exception for Trade Finance requests that failed to create Amount Block in backend system.

Log in into Oracle Banking Trade Finance Process Management (OBTFPM) system amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue.

Open the task to view the summary tiles. The tiles should display a list of important fields with values.

In Amount block, system checks whether the sufficient balance is available in the account to create the block. On hand-off, system will debit the blocked account to the extent of block and credit charges/ commission account in case of charges block or credit the amount in suspense account for blocks created for collateral.

On Approval, system should not release the Amount Block against each applicable account and system should handoff the "Amount Block Reference Number "to the back office. On successful handoff, back office will make use of these "Amount Block Reference Number" to release the Amount Block done in the mid office (OBTFPM) and should debit the CASA account from the Back office. If multiple accounts are applicable, Amount Block.

Reference for all accounts to be passed to the back office.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

- Approve:
 - Settlement amount will be funded (outside of this process)
 - Allow account to be overdrawn during hand-off
- Refer:
 - Refer Refer back to DE providing alternate settlement account to be used for block.
 - Different collateral to be mapped or utilize lines in place of collateral.
- Reject: Reject the transaction due to non-availability of sufficient balance in settlement account

Table 2-25 Amount Bock Exception - Action Buttons - Field Description

Exception - Know Your Customer (KYC)

As part of KYC validation, application will check if necessary KYC documents are available and valid for the applicant. The transactions that have failed KYC due to non-availability / expired KYC verification will reach KYC exception stage.

- 1. Log in into OBTFPM application, KYC exception queue. KYC exception failed tasks for Trade Finance transactions will be listed in your queue.
- 2. Open the task, to see summary tiles that display a summary of available updated fields with values.

User can pick up a transaction and do the following actions:

Approve

- After changing the KYC status in the back end application (outside this process).
- Without changing the KYC status in the back end application.
- Reject (with appropriate reject reason).

2.5 Multi Level Approval

This topic helps you quickly get acquainted with the Multi Level Approval process.

This stage allows the approver user to approve a Islamic Shipping Guarantee Issuance transaction. The user can view the Summary tiles. The tiles should display a list of important fields with values. User must be able to drill down from summary tiles into respective data segments to verify the details of all fields under the data segment.

- 1. Log in into OBTFPM application and on Home screen, click, Task.
- 2. Under Task, click Free Task.
- 3. Select the appropriate task and click Acquire & Edit to edit the task or click Acquire to edit the task from My Tasks.
- 4. The acquired task will be available in **My Tasks** tab. Click **Edit** to approve the task.

The Approval Re-Key pop-up screen appears.

Figure 2-20 Approval Re-Key

| | | view Signature | | Remarks |
|-------------|------|----------------|------|-----------|
| | | | | |
| urrency | | | | 0 |
| GBP | | | • | \odot |
| ontract Amo | ount | | | |
| GBP | • | £1,000 | 0.00 | \oslash |

The application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message and user will not be able to approve the task.

5. Open the task and re-key some of the critical field values from the request in the **Approval Re-Key** screen.

Some of the fields below will dynamically be available for re-key.:

- Currency
- Amount

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.

6. Click **Proceed** to proceed for the approval.

The **Approval Summary** screen appears. The user can view the Summary tiles which displays list of important fields with values.

 Click each tile to drill down from summary tiles into respective data segments to verify the details of all fields under the data segment.
