This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software" or "commercial computer software documentation" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

# Preface

## Purpose

This guide describes the systematic instruction to integrate Oracle Banking Virtual Account Management with Oracle Banking Digital Experience and its specific maintenance.

## Audience

This guide is primarily intended for the following user/user roles:

**Table 1 Audience**

Role	Function
Implementation and IT Staff	Implementation and maintenance of the software

## Acronyms and Abbreviations

The list of the acronyms and abbreviations used in this guide are as follows:

**Table 2 Acronyms and Abbreviations**

Acronyms	Description
API	Application Programming Interface
JWT	JSON Web Token

## List of Topics

This guide is organized as follows:

**Table 3 List of Topics**

Topics	Description
<a href="#">Integration Guide</a>	This topic provides information on the integration of Oracle Banking Virtual Account Management with Oracle Banking Digital Experience.

# 1

## Integration Guide

This topic provides the information on the integration of Oracle Banking Virtual Account Management with Oracle Banking Digital Experience.

- [Maintenance for Oracle Banking Virtual Account Management](#)  
This topic describes the specific maintenance required for Oracle Banking Virtual Account Management to integrate with Oracle Banking Digital Experience.
- [OAuth Token Generation](#)  
This topic provides the information to access service APIs by passing OAuth token (prior versions - JWT token) as one of the headers from Oracle Banking Virtual Account Management.

### 1.1 Maintenance for Oracle Banking Virtual Account Management

This topic describes the specific maintenance required for Oracle Banking Virtual Account Management to integrate with Oracle Banking Digital Experience.

Specify **User ID** and **Password**, and login to **Home screen**.

#### **User Maintenance**

Create a user for Oracle Banking Digital Experience and assign a role for the user to perform service API operations in Oracle Banking Virtual Account Management.

Refer to **Oracle Banking Security Management System User Guide** for a detailed explanation.

1. On **Home** screen, click **Security Management**. Under **Security Management**, click **User**.
2. Under **User**, click **Create User**.

The **Create User** screen displays.

**Figure 1-1 Create User**

### Upload Source Code Maintenance

Maintain an entry for Oracle Banking Digital Experience in the **Upload Source** screen. Refer to **Oracle Banking Common Core User Guide** for a detailed explanation.

3. On **Home** screen, click **Core Maintenance**. Under **Core Maintenance**, click **Upload Source**.
4. Under **Upload Source**, click **Create Upload Source**.

The **Create Upload Source** screen displays.

**Figure 1-2 Create Upload Source**

## 1.2 OAuth Token Generation

This topic provides the information to access service APIs by passing OAuth token (prior versions - JWT token) as one of the headers from Oracle Banking Virtual Account Management.

Follow the below steps for OAuth token generation:

1. Generate JWT token by using the below endpoint and headers. (same as prior version)

Make HTTP POST call to the below endpoint.

URL: `http://<hostname>:<port>/api-gateway/platojwtauth/`

Header: `appId: SECSRV001`

Header: `content-Type: application/json`

In the POST body, mention the Base64 encoded username as username and Base64 password as password in the JSON format.

**Sample POST body:**

```
{
  "username": "T0JEWDAx",
  "password": "d2VsY29tZQ=="
}
```

2. Registering clients for OAuth

Make HTTP POST call to the below endpoint.

End Point: `http://<hostname>:<port>/api-gateway/createOauthUsers`

Header: `appId: SECSRV001`

Header: `content-Type: application/json`

Header: `userId: <USERID>`

Header: `Authorization: Bearer <<JWT token created in step 1>>`

In Request Body, `ClientId` should be Oracle Banking Virtual Account Management User Id created for Oracle Banking Digital Experience and `ClientSecret` should be the secret password for the OAuth client registration. In addition, the validity is mentioned in seconds till when the token is active.

**Sample Request Body:**

```
{
  "UserList":
  [
    {
      "clientId": "client1",
      "clientSecret": "secret1",
      "validity": "86400"
    },
    {
      "clientId": "client2",
      "clientSecret": "secret2",
      "validity": "86400"
    }
  ]
}
```

```
    }  
  ]  
}
```

### 3. Generate OAuth Token

To get the OAuth token, make an HTTP POST call to the below endpoint with the `clientId` and `clientSecret` created in Step 2.

URL: `http://<hostname>:<port>/api-gateway/platojwtauth/`

Header: `appId: SECSRV001`

Header: `content-Type: application/json`

Header: `sourceCode: <SOURCECODE>`

 **Note:**

Source Code created for Oracle Banking Digital Experience in [Figure 1-2](#) screen.

In the POST body, mention the Base64 encoded `clientId` as `username` and Base64 `clientSecret` as `password` in the JSON format.

#### Sample Oauth Token Response:

```
{  
  "super_user_locale": null,  
  "scope": "resource-server-read resource-server-write",  
  "super_user": "N",  
  "token_type": "bearer",  
  "entity_id": "DEFAULTENTITY",  
  "expires_in": "588168",  
  "token": "38uuHYumJhyKGKEuouaQ988cXLc"  
}
```

Use the OAuth token, `userId` and `sourceCode` as headers in Oracle Banking Digital Experience setup, to access Oracle Banking Virtual Account Management Service APIs.
