Purpose

This guide provides step-by-step instructions to onboard a retail customer using Oracle Banking Enterprise Party Management.

Audience

This guide is intended for the bankers who are responsible for onboarding retail customers into the bank.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

Related Resources

For more information, see these Oracle resources:

Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

Acronyms and Abbreviations

The following acronyms and abbreviations are used in this guide:

Table Acronyms and Abbreviations

Acronym/ Abbreviation	Description
CIF	Customer Information File
KYC	Know Your Customer
SME	Small and Medium Enterprise

Basic Actions

Most of the screens contain icons to perform all or a few of the basic actions. The actions which are called here are generic, and it varies based on the usage and the applicability. The table below gives a snapshot of them:

Table Common Icons and its Definitions

Icon	Operation
Submit	Click Submit to default the checklists applicable for the stage based on the application category. On verifying all the checklists and on the selection of the outcome, the task will be submitted.
Post	Click Post to post the comments below the Comments text box.
Cancel	Once you click Cancel , the system will ask for confirmation, and on confirming, the task will be closed without saving the data.
Hold	Click Hold to save the captured details and suspend the task status. The suspended task will be available in the Hold queue. This option is used if there is any pending information to be captured. If mandatory fields have not been captured, the system will display an error until the mandatory fields have been captured.
Next	Click Next to save the captured details and then the system will move to the next screen. If mandatory fields have not been captured, the system will display an error until the mandatory fields have been captured. If mandatory fields have not been captured, the system will display an error until the mandatory fields have been captured.
Back	Click Back to save the captured details and move to the previous screen.
Save and Close	Click Save and Close to save the captured details. If mandatory fields have not been captured, the system will display an error until the mandatory fields are captured.

Symbols and Icons

The following are the symbols you are likely to find in this guide:

Party Management

Party Management features allows user to onboard, amend, and view party using a workflow-based process. Workflow based process enables a streamlined and controlled party management processes.

This topic contains the following subtopics:

- [Retail Onboarding](#)
Retail party onboarding in a bank involves the process of enrolling new individual customers into the bank's system to establish their accounts and services. This process is designed specifically for retail or individual customers, distinct from corporate or institutional clients.
- [Retail Amendment](#)
In the **Amendment** stage, the relationship manager can amend the information or can add additional information about a retail customer using Oracle Banking Enterprise Party Management.
- [Retail View](#)
In this *retail view* stage, the relationship manager can view the information about a retail customer using Oracle Banking Enterprise Party Management.

1.1 Retail Onboarding

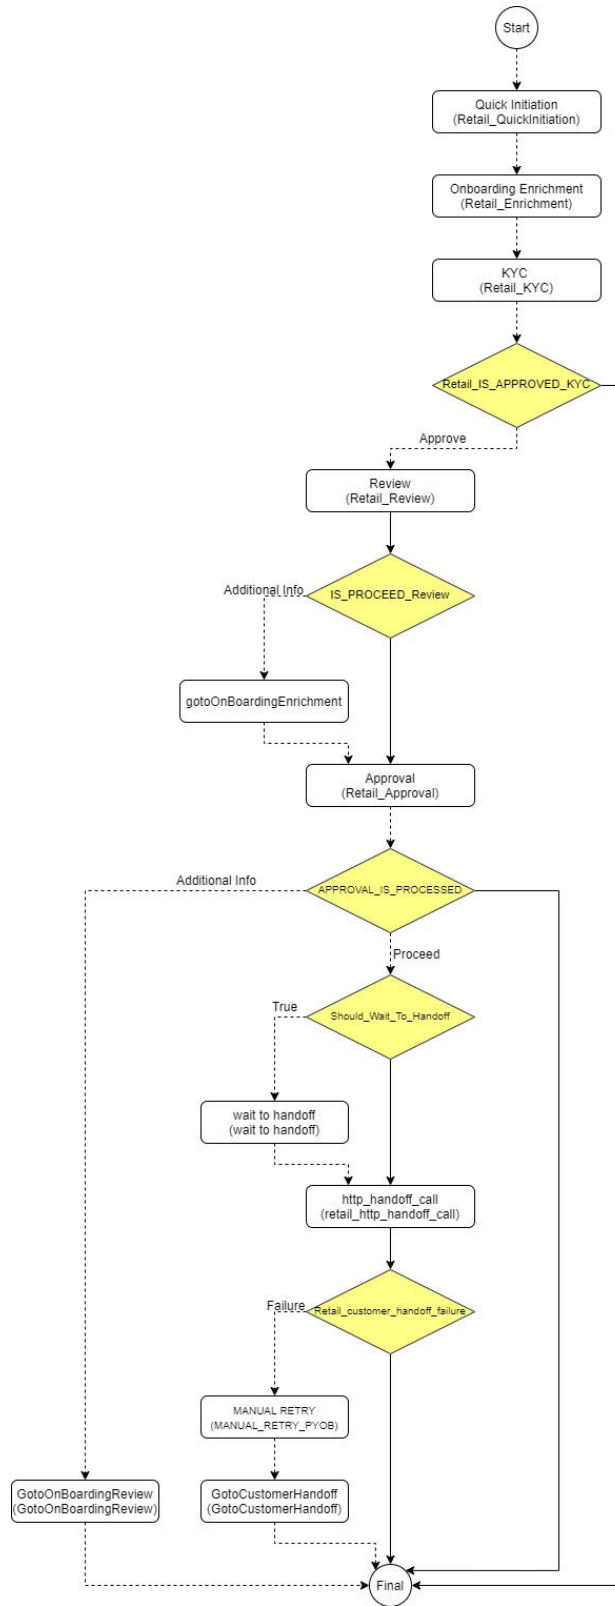

Retail party onboarding in a bank involves the process of enrolling new individual customers into the bank's system to establish their accounts and services. This process is designed specifically for retail or individual customers, distinct from corporate or institutional clients.

Retail party onboarding encompasses collecting, evaluating, and authorizing customer information to facilitate secure retail banking operations.

Process Flow Diagram

The flow diagram illustrating the different stages in the Retail Onboarding process is shown below for reference:

Figure 1-1 Quick Initiation

- **Onboarding Initiation**
In the *Initiation* stage, the Relationship Manager can capture brief information about the retail customer to be onboarded using Oracle Banking Enterprise Party Management.
- **Onboarding Enrichment**
In the *Enrichment* stage, the relationship manager can capture detailed information about the retail customer to be added in the Oracle Banking Enterprise Party Management.
- **KYC Check**
KYC check for the retail customer is populated based on the product selected by that customer. The banks can directly perform the KYC check by themselves or reach external agencies for the KYC Information.
- **Recommendation**
In this stage, the final Recommendation user reviews the customer details and moves the task to Approval stage if the details are appropriate.
- **Approval**
In this stage, an approver can view the customer information and decide to approve or reject the party onboarding application based on comments provided in Recommendation stage.

1.1.1 Onboarding Initiation

In the *Initiation* stage, the Relationship Manager can capture brief information about the retail customer to be onboarded using Oracle Banking Enterprise Party Management.

 **Note:**

User should have required Personal Identifiable Information (PII) access to onboard a party, if PII fields are configured. Refer to the **Oracle Banking Party Configurations User Guide** for more details.

1. On the **Homepage**, under **Party Services**, click **Party Management**.
2. Under **Party Management**, click **Onboarding**.

The **Onboarding** screen displays.

Figure 1-2 Onboarding Initiation

The screenshot shows a web interface titled "Onboarding". It features a "Customer Type" dropdown menu with "Retail" selected. To the right of the dropdown are two buttons: "Onboard Now" and "Cancel". The background of the interface has a decorative pattern of overlapping circles.

3. On the **Onboarding** screen, specify the fields. For more information on fields, refer to the field description table.

Table 1-1 Onboarding Initiation - Field Description

Field	Description
Customer Type	Select Retail from the drop-down values. The available options are: <ul style="list-style-type: none"> • Retail • Corporate • Small and medium Business • Small Medium Enterprise
Business Process Code	If required, select the desired business process code. <div style="border: 1px solid #ccc; background-color: #e6f2ff; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>This field is displayed and required only if more than one process code is configured for a given customer type. The drop-down values will be based on the process code configuration.</p> </div>

4. Click **Onboard Now**.

The **Retail Onboarding - Quick Initiation** screen is displayed.

Figure 1-3 Retail Onboarding - Quick Initiation

5. On the **Quick Initiation** screen, specify the details. For more information on fields, refer to the field description table.

Table 1-2 Quick Initiation – Field Description

Field	Description
First Name	Specify the first name of the party.
Middle Name	Specify the middle name of the party.
Last Name	Specify the last name of the party.
Maiden Name	Specify the maiden name of the party.

Table 1-2 (Cont.) Quick Initiation – Field Description

Field	Description
Date of Birth	<p>Specify the birth date of the party. Based on the date of birth and minor age configuration, the party will be identified as a major customer or minor customer.</p> <div style="border: 1px solid #ccc; background-color: #e6f2ff; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>Refer to the Oracle Banking Party Configurations User Guide for minor age configuration.</p> </div>
Gender	<p>Specify the gender of the party.</p> <ul style="list-style-type: none"> • Male • Female • Other • Do Not Wish to Disclose <div style="border: 1px solid #ccc; background-color: #e6f2ff; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>The list of values can be configured through Entity Maintenance.</p> </div>
Birth Country	<p>Country of birth of as per basic information of the party.</p> <div style="border: 1px solid #ccc; background-color: #e6f2ff; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>The list of countries are available as per configuration in Common Core Maintenance for Country Code.</p> </div>
Citizenship By	<p>Method through which citizenship is acquired by the party.</p> <ul style="list-style-type: none"> • Birth • Acquire • Others • Residence <div style="border: 1px solid #ccc; background-color: #e6f2ff; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>The list of values can be configured through Entity Maintenance.</p> </div>

Table 1-2 (Cont.) Quick Initiation – Field Description

Field	Description
Country of Residence	Country of residence as per basic information of the party.  Note: The list of countries are available as per configuration in Common Core Maintenance for Country Code.
Customer Category	Category of party as per basic information of the party.
Application Priority	Select the priority of the party onboarding application from the drop-down list. The available options are: <ul style="list-style-type: none"> • Low • Medium • High
Customer Access Group	Click Search and select the user access group for a party.  Note: Customer Access Groups are available as per configuration in Common Core Maintenance for Customer Access Group.

6. Click **Submit**.

The system will check for duplicate customers (Dedupe Check). For more information, refer to the [Duplication Check \(De-dupe Check\)](#).

If there is no duplicate customer existed in the system, then the system creates a unique party ID for the customer and displays the **Initiation - Basic Details** screen. For more information, refer to the [Onboarding Enrichment - Basic Information](#). The retail onboarding quick initiation screen is displayed with following sections to capture additional party details.

- Basic Details
- Relationships
- Educational Qualification
- Employment
- Financial Information
- MIS Details
- Comments
- Review and Submit
- [Onboarding Initiation - Basic Details](#)
The basic detail section offers fundamental information about the party, encompassing demographic details, address information, contact details, and other pertinent data.

- [Onboarding Initiation - Relationship](#)
The relationship section furnishes information concerning the connections between the party and related parties, including household members, guardians, custodians, and other relevant affiliations.
- [Onboarding Initiation - Educational Qualification](#)
The educational qualification section offers detailed information regarding the academic background of the party.
- [Onboarding Initiation - Employment](#)
The employment section furnishes comprehensive details regarding the party's employment status, encompassing both salaried positions and self-employment endeavors.
- [Onboarding Initiation - Financial Information](#)
The financial information section pertains to details regarding the party's financial status, including income, assets, liabilities, and other relevant financial data.

Referral Source	Select the referral source from the drop-down values. The available options are: <ul style="list-style-type: none"> • Website • Social Media • News/Magazine • Coworker Friend • Family Member • Employer • Other
Membership Start Date	Specify the Input membership start date of the party with financial institution.
Customer Status	Select Customer Status from the drop-down values. The available options are: <ul style="list-style-type: none"> • Active • Prospect Customer • Prospect
Sponsorship	Select Sponsorship from the drop-down values. The available options are: <ul style="list-style-type: none"> • Grandparents • Siblings • Spouse
Contact Date	Specify the customer last contact date. Field is only available during view process.
Contact Time	Customer last contact time. Field is only available during view process
Activity	Last activity executed by customer Field is only available during view process
Source System	Source system through which last contact details are updated. Field is only available during view process
Last System Update	Last system initiated amendment date. Field is only available during view process
Last Customer Update Date	Last customer initiated amendment date. Field is only available during view process
Ref No.	Reference number of last customer contact. Field is only available during amendment process
Remarks	Remarks for last customer contact. Field is only available during amendment process
Frozen	Flag to identify if party status is frozen. Field is only available during amendment process

Table 1-4 (Cont.) Basic Info and Citizenship – Field Description

Field Name	Description
Bankrupt	Flag to identify if party status is bankrupt. Field is only available during amendment process
Whereabouts Unknown	Flag to identify if party status is whereabouts unknown. Field is only available during amendment process
Deceased	Flag to identify if party status is deceased. Field is only available during amendment process
Date of Deceased	Date of Deceased, if Deceased flag is enabled. Field is only available during amendment process
Date of Delete Flag	Input the date, party is marked for deletion. Field is only available during amendment process
Facebook	Select the address of the Facebook profile.
Twitter	Select the address of the Twitter profile.
Instagram	Select the address of the Instagram profile.
LinkedIn	Select the address of the LinkedIn profile.
Blog	Select the address of the Blog profile.
Tumblr	Select the address of the Tumblr profile.

 **Note:**

Refer to the **Oracle Banking Party Configurations User Guide** for entity maintenance.

3. Click and expand the **Contact Details** data Segment.
The **Contact Details** screen displays.

Figure 1-5 Initiation - Contact Details

4. On the **Contact Details** screen, under the **Mobile Phone** and **Email** tabs, specify the details. For more information on fields, refer to the field description below.

Table 1-5 Media (Mobile Phone) – Field Description

Field	Description
ISD Code	Specify the ISD code for the mobile number of the customer.

Table 1-5 (Cont.) Media (Mobile Phone) – Field Description

Field	Description
Contact Sub-type	Select contact sub-type from the drop-down values. The available options are: <ul style="list-style-type: none"> • Residence • Business • Mobile • Others
Mobile Number	Specify the mobile number of the customer.
Preferred	Specify the preferred mobile number, in case more than one mobile number is captured. <div style="border-left: 2px solid #0070C0; border-right: 2px solid #0070C0; border-bottom: 2px solid #0070C0; padding: 10px; margin-top: 10px;"> <p> Note: Only one mobile number should be marked as preferred.</p> </div>

Table 1-6 Media (Email) – Field Description

Field	Description
Email Id	Specify the email id of the customer. Email ID should be as per email id format.
Contact Sub-type	Select contact sub-type from the drop-down values. The available options are: <ul style="list-style-type: none"> • Personal • Work
Preferred	Specify the preferred email id, in case more than one email id is captured. <div style="border-left: 2px solid #0070C0; border-right: 2px solid #0070C0; border-bottom: 2px solid #0070C0; padding: 10px; margin-top: 10px;"> <p> Note: Only one email should be marked as preferred.</p> </div>

 **Note:**

Refer to the **Oracle Banking Party Configurations User Guide** for entity maintenance.

5. Click and expand the **Current Address** section.
6. Click on the + button to add the address details.
The **Add Address** screen displays.

Figure 1-6 Add Address

7. On the **Add Address** segment, specify the fields. For more information on fields, refer to the field description table.

Table 1-7 Add Address – Field Description

Field	Description
Address Type	<p>Select the address type from the drop-down list. The available options are:</p> <ul style="list-style-type: none"> • Residential Address • Communication Address <p> Note:</p> <p>Address type can be configured as mandatory using Address Management. Refer to the Oracle Banking Party Configurations User Guide for more details.</p>
Location	<p>Click Search and select the preferred location from the list of values.</p> <p> Note:</p> <p>The list of values can be configured through Common Core Maintenance for Location Code.</p>

Table 1-7 (Cont.) Add Address – Field Description

Field	Description
Preferred	<p>Click the toggle to specify the preferred to be used for communication.</p> <p> Note:</p> <p>If more than one address is captured for the same address type, at-least one address should be marked as preferred.</p>
Address Since	Specify address start date.
Country	<p>Click</p> <p></p> <p>icon and select the country from the list of values.</p> <p> Note:</p> <p>The list of values can be configured through Common Core Maintenance for Country Code.</p>
State / Country Subdivision	<p>Specify State or Country Sub-division. The field will be populated only when country is selected.</p> <p> Note:</p> <p>The list of states will be available based on state configuration for the selected country. Refer to the Common Core User Guide for state maintenance.</p>
Address Line 1 / Building Name	Specify Address Line 1 or Building Name.
Address Line 2 / Street Name	Specify Address Line 2 or Street Name.

Zip Code / Post Code	Specify Zip Code or Post Code.
Address Source	<p>Select the address type from the drop-down list. The available options are:</p> <ul style="list-style-type: none"> • Customer • Research • Other

 **Note:**

Refer to the **Oracle Banking Party Configurations User Guide** for entity maintenance.

- Expand the **Additional Info** section on the **Add Address** segment.
The **Additional Info** data segment is displayed.

Figure 1-7 Additional Info

The screenshot shows a form titled 'Additional Info' with a dropdown arrow. Below the title are ten input fields arranged in a grid:

- Department
- Sub Department
- Building Number
- Floor
- Post Box
- Room
- Town Location Name / Locality
- District Name
- Landmark
- Contact Name / Narrative

- Specify the details in the **Additional Info** segment. For more information on fields, refer to the field description table.

Table 1-8 Additional Info – Field Description

Field	Description
Department	Specify the name of the department for the customer.
Sub Department	Specify the sub-department for the customer.
Building Number	Specify the building number.
Floor	Specify the floor for the given address.
Post Box	Specify the post box.
Room	Specify the room for the given address.
Town Location Name / Locality	Specify Town Location or Locality Name.
District Name	Specify the district name.
Landmark	Specify the near Landmark to address.
Contact Name / Narrative	Specify Contact Name or Narrative for the address

 **Note:**

Refer to the **Oracle Banking Party Configurations User Guide** for entity maintenance.

- On the **Add Address** screen, in the **Media For Address** segment, specify the details under the **Mobile Phone** tab.

Figure 1-8 Mobile Phone

11. On the **Mobile** tab, click + icon.
The **Add Mobile Number** pop-up screen is displayed.
12. Specify the details in the **Add Mobile Number** pop-up screen. For more information on the fields, refer to the field description table.

Table 1-9 Media (Mobile Phone) – Field Description

Field	Description
ISD Code	Specify the ISD code for the mobile number of the customer.
Mobile Number	Specify the mobile number of the customer.
Preferred	Specify the preferred mobile number, in case more than one mobile number is captured.

13. On the **Add Address** screen, in the **Media** segment, specify the details under the **Email** tab.

Figure 1-9 Email

14. On the **Email** tab, click + icon.
The **Add Email** pop-up screen is displayed.
15. Specify the details in the **Add Email** pop-up screen. For more information on the fields, refer to the field description table.

Table 1-10 Media

Field	Description
Email Id	Specify the email id of the customer.
Preferred	Specify the preferred email id, in case more than one email id is captured.

 **Note:**

Refer to the **Oracle Banking Party Configurations User Guide** for entity maintenance.

16. On the **Basic Details** screen, click and expand **Previous Address** segment.
The **Previous Address** screen is displayed.
17. On the **Previous Address** screen, click + icon.
The **Add Address** pop-up screen is displayed.

Figure 1-10 Add Address

18. On the **Add Address** pop-up screen, specify the fields. For more information on the fields, refer to the field description table.

Table 1-11 Add Address – Field Description

Field	Description
Address Type	<p>Select the address type from the drop-down list. Table 1-11 (Cont.) Add Address – Field Description

Field	Description
Location	Click Search and select the preferred location from the list of values.  Note: The list of values can be configured through Common Core Maintenance for Location Code.
Address From	Specify address start date.
Address To	Specify address end date.
Country	Click Search icon and select the country from the list of values.  Note: The list of values can be configured through Common Core Maintenance for Country Code.
State / Country Sub-Division	Specify State or Country Sub-division.
Address Line 1 / Building Name	Specify Address Line 1 or Building Name.
Address Line 2 / Street Name	Specify Address Line 2 or Street Name.
Address Line 3 / City / Town Name	Specify Address Line 3 or City Name or Town Name.
Zip Code / Post Code	Specify Zip Code or Post Code.
Address Source	Select the address source from the drop-down list. The available options are: <ul style="list-style-type: none"> • Customer • Research • Other

 **Note:**

Refer to the **Oracle Banking Party Configurations User Guide** for entity maintenance.

19. On the **Add Address** pop-up screen, click and expand **Additional Info** segment. For more information, refer to the **Additional Info** segment in this **Basic Info** screen.
20. On the **Basic Details** screen, click and expand **ID Details** segment.
The **ID Details** screen is displayed.

Figure 1-11 ID Details

21. On the **ID Details** segment, click  icon.
The **Add ID Details** pop-up screen is displayed.
22. On the **Add ID Details** pop-up screen, specify the fields. For more information on fields, refer to the field description table.

Table 1-12 ID Details - Field Description

Field	Description
ID Type	<p>Select type of identification from the drop-down list.</p> <ul style="list-style-type: none"> • State Issued Driver • Passport • State Issued Non-Driver ID • Birth Certificate • Social Security Card • Military ID • Matricula Card • Employment Authorization Card • Permanent Resident Card (Green Card) <p> Note: The list of values can be configured through Entity Maintenance.</p>
ID Status	<p>Select Status of Identification from drop down list.</p> <ul style="list-style-type: none"> • Available • Applied For <p> Note: List of values can be configured through Entity Maintenance.</p>
Unique ID	Specify unique ID number as per the ID type.
Place of issue	Specify place of issue of ID.
Valid From	Specify valid from date of ID.
Valid Till	Specify validity end date of ID.
Remarks	Specify remarks for ID.

Table 1-12 (Cont.) ID Details - Field Description

Field	Description
Preferred	Select, if ID type is preferred.  Note: Only one ID record should be marked as preferred.

 **Note:**
Refer to the **Oracle Banking Party Configurations User Guide** for entity maintenance.

- Click and expand **Tax Declaration** section.
The **Tax Declaration** screen is displayed.

Figure 1-12 Tax Declaration

- Click on the  button to specify the details.
The **Add Tax** pop-up screen is displayed.
- On **Add Tax** pop-up screen, specify the fields. For more information on fields, refer to the fields description table.

Table 1-13 Add Tax – Field Description

Field	Description
TIN Type	Select the type of tin from the drop-down list. The available options are: <ul style="list-style-type: none"> • sssSocial Security Number • Employer Identification Number • Adoption Tax Identification • Individual Tax Identification Number

Table 1-13 (Cont.) Add Tax – Field Description

Field	Description
TIN Status	Select tin status from the drop-down list. The available options are: <ul style="list-style-type: none"> a. Non-Resident Alien <ul style="list-style-type: none"> • Certified • Certified – Due for recertification • Uncertified – No W8-BEN Received • Uncertified – Recertification past due b. Resident Alien/Citizen <ul style="list-style-type: none"> • Certified • TIN Applied for • Missing Tin • Incorrect TIN • TIN Captured but Not Certified
Tax Identification Number	Specify unique Tax Identification Number as issued by the tax authority.
Foreign Tax Identification Number	Specify the Tax Identification Number assigned to the user by a foreign tax authority.
Form Type	The form type is defaulted based on the resident status field as below. Resident Alien = W9 Citizen = W9 Non Resident Alien = W8 <div style="border: 1px solid #0070C0; padding: 5px; margin-top: 10px;"> <p> Note:</p> <p>If the resident status entity codes are configured other than above mentioned values, form type will be available for the user selection.</p> </div>
Form Start Date	Displays the current branch date and it can be modified.
Form End Date	<ul style="list-style-type: none"> • The date will be auto-calculated for Form W8 as current year plus 3 years. • The till date is not applicable for Form W9. <div style="border: 1px solid #0070C0; padding: 5px; margin-top: 10px;"> <p> Note:</p> <p>If resident status entity codes are configured other than above mentioned values, the valid from date will be available for user to select.</p> </div>
Certification Date	Specify the date on which the W-8 form was signed and certified.
Backup Withholding Exemption	Indicate whether the party is exempt from backup withholding. This field is used to determine if the party is exempt from backup withholding, which is a federal tax withheld from certain payments if the IRS has not received a proper tax identification number or if certain conditions are met. Claiming this exemption ensures that no backup withholding tax is applied to applicable payments.

Table 1-13 (Cont.) Add Tax – Field Description

Field	Description
Backup Withholding Code	Select backup withholding code from the drop-down list. The available options are: <ul style="list-style-type: none"> • Missing TIN (A Type): TIN not provided or not certified. • Invalid TIN (B Type): Incorrect TIN numbers, mismatch with IRS records, missing digits. • IRS Induced (C Type): IRS notification of customer underreporting. • Customer Induced (D Type): Customer failed to certify non-subject status or C Notice receipt. • W-8 Expired: Expired Form W-8BEN.

8. On the **Review and Submit** screen, review the customer information and perform the following actions:

Table 1-73 Actions - Description

Action	Description
Submit	Click Submit . The Checklist window is displayed.
Outcome	On the Checklist window, select the Outcome as Proceed and click Submit .

In the **Review** stage, the final reviewer reviews the customer details and moves the task to the **Approval** stage if the details are appropriate. If the details are inappropriate, the reviewer can send the task to the previous stage. After submitting the Review, the system moves the task to the **Approval** stage.

In the **Approval** stage, the head of the division can view the customer information and decide to approve or reject the task based on comments from the Reviewer. If the outcome of this stage is **Proceed**, the task is automatically moved to the host system. For more detail on the *Review* and **Approval** stages, refer to [Recommendation](#) and [Approval](#).

1.3 Retail View

In this *retail view* stage, the relationship manager can view the information about a retail customer using Oracle Banking Enterprise Party Management.

To initiate the Amendment process:

- User must have required customer group access to view a party within a customer access group.
- User must have required Personal Identifiable Information (PII) access to view a party, if PII fields are configured.

1. On the **Homepage**, under **Party Services**, click **View**.

The **View** screen is displayed.

2. Specify the **CIF** or search for a **CIF**. For advance search, click **Advance Search** button. The following values are available for the advance CIF search:

- Party ID
- First Name
- Middle Name
- Last Name
- Data of Birth
- Unique ID
- Mobile Number
- Email

3. Click **View Customer**.

The **Party View** screen is displayed.

4. Click  icon of the respective section for which the information needs to be updated. You can view the following sections during party view:

- General Information – For more information, refer to [Onboarding Initiation - Basic Details](#).
- Signature - For more information, refer to the [Onboarding Enrichment - Signatures](#).
- Relationships - For more information, refer to the [Onboarding Initiation - Relationship](#).
- Professional Information
 - a. Education Details - For more information, refer to [Onboarding Initiation - Educational Qualification](#).
 - b. Membership Details - For more information, refer to [Onboarding Enrichment - Membership / Association](#).
- Employment - For more information, refer to [Onboarding Enrichment - Employment](#).
- Consent and Preferences - For more information, refer to [Onboarding Enrichment - Consent and Preferences](#).
- Additional Info - For more information, refer to [Onboarding Enrichment - Additional Information](#).
- Supporting Documents - For more information, refer to the [Figure 1-36](#).

Insta Party Management

Insta party management feature allows user to onboard and amend party using a single screen, enhancing the user experience by providing a straight forward and efficient way to onboard and make amendments to party-related information. The following information can be captured and amended during the insta party onboarding and amendment.

This topic contains the following subtopics:

- [Insta Retail Onboarding](#)
Insta Retail Onboarding feature allows user to onboard party using a single screen.
- [Insta Party Amendment](#)
Insta Party Amendment feature allows user to amend party using a single screen.
- [Insta Party View](#)
Insta Party View feature allows to view party details using a single screen.

2.1 Insta Retail Onboarding

Insta Retail Onboarding feature allows user to onboard party using a single screen.

To initiate the insta onboarding process:

1. On the **Homepage**, under **Party Services**, click **Insta Party Management**.
2. Under **Insta Party Management**, click **Onboarding**.
The **Onboarding** screen is displayed.

Figure 2-1 Onboarding - Insta Party Management

The screenshot displays the 'Onboarding' screen within the 'Insta Party Management' application. On the left, a dark blue sidebar menu is visible with the following items: '< Insta Party Management', 'Onboarding', 'Amendment', and 'View'. The 'Onboarding' item is highlighted. The main content area has a light beige background with a subtle pattern. At the top of this area, there is a 'Menu Item Search...' field with a magnifying glass icon. Below this, the title 'Onboarding' is centered. The main form area contains two input fields: 'Party Type' with a dropdown arrow and 'Retail' selected, and 'KYC Reference Number' with a search icon. In the bottom right corner of the form area, there are two buttons: 'Onboard Now' and 'Cancel'.

3. On the **Onboarding** screen, specify the fields. For more information on fields, refer to the field description table.

Table 2-1 Onboarding - Field Description

Field	Description
Party Type	Select Retail from the drop-down values. The available options are: <ul style="list-style-type: none"> • Retail
KYC Reference Number	Specify the KYC reference number or click Search icon for a KYC reference number. The following values are available for KYC reference search. <ul style="list-style-type: none"> • Party ID • First Name • Middle Name • Last Name • Data of Birth • Unique ID/National ID • Mobile Number • Email <div style="border: 1px solid #0070C0; padding: 10px; margin-top: 10px;"> <p> Note:</p> <ul style="list-style-type: none"> • Unique ID is the ID captured in ID details data segment. National ID is captured as part of Basic Info & Citizenship. • Refer to the KYC Management section for the KYC Reference Number. </div>

4. Click **Onboard Now**.

The **Insta Retail Onboarding** screen is displayed.

Figure 2-2 Insta Retail Onboarding

Click and expand each data segment to provide required inputs for the party onboarding.

- [Insta Retail Onboarding - Basic Details](#)
You can add personal details such as name, date of birth, and address of the customer to be onboarded in the **Basic Details** screen.

- [Insta Retail Onboarding - Documents & Images](#)
 Section to upload party documents including the supporting document and signatures.
- [Insta Retail Onboarding - Relationships](#)
 The details about the relationships of the customer to be onboarded are added in the Relationship segment. Adding relationship details is beneficial to both the customer and the bank during critical events.
- [Insta Retail Onboarding - Employment Details](#)
 Employment data segment captures employment details of a retail party. A retail party can be employed as a salaried or a self-employed profession. Employment details are necessary for a bank to determine the professional stability of the party.
- [Insta Retail Onboarding - Consent & Preferences](#)
 Section to add consent and preferences of the party including e-sign, marketing, minor, and tax.
- [Insta Retail Onboarding - Additional Info](#)
 Section to add additional information related such as Insider, special needs, PEP, and armed forces details.
- [Insta Retail Onboarding - Membership & Association](#)
 Section to add Membership and Association information related to the party.
- [Insta Retail Onboarding - Financial Information](#)
 Section to add financial information related to party including asset, liability, income, and expense.

2.1.1 Insta Retail Onboarding - Basic Details

You can add personal details such as name, date of birth, and address of the customer to be onboarded in the **Basic Details** screen.

Note:

The fields marked as **Required** are mandatory.

Basic details screen captures the following data segments to capture Party basic details.

Table 2-2 Data Segment - Description

Sl.No	Data Segment Name	Mandatory / Optional / Conditional	Description
1	Basic Info and Citizenship	Mandatory	Data Segment to capture basic personal information of the party.

Table 2-2 (Cont.) Data Segment - Description

2	Current Address	Conditional	Data segment for current address of the party such as current communication address, current residential address, etc.
3	Previous Address	Optional	Data segment for previous addresses of the party such as previous communication address, previous residential address, etc.
4	ID Details	Optional	Data segment to view identity details of the party such as Passport, Driving License, etc.
5	Contact Details	Optional	Data segment to view contact details of the party such as Mobile, Email, Phone, etc.
6	Tax Declaration	Optional	Data segment to view tax details of the party such as Form W8-BEN, W9 etc.
7	Educational Qualification	Optional	Data segment to view educational qualification of the party.
8	Visa Details	Optional	Data segment to view visa details of the party.
9	Dates	Optional	Data segment to view key and important dates related to party.
10	Social Profile	Optional	Data segment to View social profile of the party such as LinkedIn, Facebook, etc.

1. On **Insta Retail View** screen, click and expand the **Basic Details** segment.
The **Basic Details** segment is displayed.
2. On the **Basic Details** segment, click **Edit** button on each widget to amend the details. For more information on **Basic Info & Citizenship**, **Current Address**, **Previous Address**, **ID Details**, **Contact Details**, **Tax Declaration**, **Educational Qualifications**, **Visa Details**, **Dates**, and **Social Profile**, refer to the [Insta Retail Onboarding - Basic Details](#) section.

2.3.2 Insta Party View - Documents & Images

Section to view party documents including the supporting document and signatures.

The following data segments are available in the **Documents & Images** screen to view the details of documents and images.

Table 2-13 Data Segment - Description

SI.No	Data Segment Name	Mandatory / Optional / Conditional	Description
1	Supporting Documents	Optional	Data segment to view supporting documents of the customer.
2	Signatures	Optional	Data segment to view signatures of the customer.

1. On **Insta Retail View** screen, click and expand the **Documents & Images** segment. The **Documents & Images** segment is displayed.
2. On the **Documents & Images** segment, click **View** button on each widget to view the details. For more information on the **Supporting Documents** and **Signatures**, refer to the [Insta Retail Onboarding - Documents & Images](#) section.

2.3.3 Insta Party View - Relationships

The Relationship segment is where customer relationship details are added, which benefits both the customer and the bank during critical events.

The following data segments are available in the **Relationships** screen to capture the basic details of a party.

Table 2-14 Data Segment - Description

SI.No	Data Segment Name	Mandatory / Optional / Conditional	Description
1	Household	Optional	Data Segment to view household relationships of the party.
2	Power of Attorney	Optional	Data Segment to view power of attorney relationships of the party.
3	Service Member	Optional	Data Segment to view service member relationships of the party.
4	Related to Insider	Optional	Data Segment to view related to insider relationships of the party.
5	Guardian	Conditional	Data Segment to view guardian relationships of the party. Either of a guardian or custodian is mandatory for a minor party.
6	Custodian	Conditional	Data Segment to view custodian relationships of the party. Either of a guardian or custodian is mandatory for a minor party.
7	Solicitor	Optional	Data Segment to view solicitor relationships of the party.

1. On **Insta Retail View** screen, click and expand the **Relationships** segment.
The **Relationships** segment is displayed.
2. On the **Relationships** segment, click **Edit** button on each widget to amend the details. For more information on the **Household, Power of Attorney, Service Member, Related to Insider, Guardian, Custodian, and Solicitor** refer to the [Insta Retail Onboarding - Relationships](#) section.

2.3.4 Insta Party View - Employment Details

The employment data section records a retail party's employment details, including whether they are salaried or self-employed. This information helps banks determine professional stability. The section includes the following data segments.

Table 2-15 Data Segment - Description

Sl.No	Data Segment Name	Mandatory / Optional / Conditional	Description
1	Salaried	Optional	A salaried employee is an individual who works for an organization and receives a fixed and regular compensation for their services provided to the organization.
2	Self-Employed/ Professional	Optional	A self-employed person does not work for a specific organization and works for oneself as a freelance or the owner of a business rather than for an employer.

1. On **Insta Retail View** screen, click and expand the **Employment Details** segment.
The **Employment Details** segment is displayed.
2. On the **Employment Details** segment, click **Edit** button on each widget to amend the details. For more information on the **Salaried** and **Self-Employed** refer to the [Insta Retail Onboarding - Employment Details](#) section.

2.3.5 Insta Party View - Consent & Preferences

Section to view consent and preferences of the party including e-sign, marketing, minor, and tax.

1. On **Insta Retail View** screen, click and expand the **Consent & Preferences** segment.
The **Consent & Preferences** segment is displayed.
2. On the **Consent & Preferences** segment, click **Edit** button on the **Consent & Preferences** widget. For more information on the **Consent & Preferences** widget refer to the [Insta Retail Onboarding - Consent & Preferences](#) section.

2.3.6 Insta Party View - Additional Info

Section to view additional information related such as Insider, special needs, PEP, and armed forces details.

1. On **Insta Retail View** screen, click and expand the **Additional Info** segment.
The **Additional Info** segment is displayed.

2. On the **Additional Info** segment, click **Edit** button on the **Additional Info** widget. For more information on the **Additional Info** widget, refer to the [Insta Retail Onboarding - Additional Info](#) section.

2.3.7 Insta Party View - Membership & Association

Section to view Membership and Association information related to the party.

1. On **Insta Retail View** screen, click and expand the **Membership & Association** segment. The **Membership & Association** segment is displayed.
2. On the **Membership & Association** segment, click **Edit** button on the **Membership & Association** widget. For more information on the **Membership & Association** widget, refer to the [Insta Retail Onboarding - Membership & Association](#) section.

2.3.8 Insta Party View - Financial Information

Section to view financial information related to party including asset, liability, income, and expense.

The following data segments can be captured in Financial Information section to capture party basic details.

Table 2-16 Data Segment - Description

SI.No	Data Segment Name	Mandatory / Optional / Conditional	Description
1	Asset	Optional	Data segment to view assets details of the party.
2	Liability	Optional	Data segment to view liability details of the party.
3	Income	Optional	Data segment to view income details of the party.
4	Expense	Optional	Data segment to view expense details of the party.
5	Other Relationship	Optional	Data segment to view other relationships of the party.
6	Beneficially Owned Company	Optional	Data segment to view beneficially owned company relations of the party.

1. On **Insta Retail View** screen, click and expand the **Financial Information** segment. The **Financial Information** segment is displayed.
2. On the **Financial Information** segment, click **Edit** button on each widget to view the details. For more information on the **Asset**, **Liability**, **Income**, **Expense**, **Other Relationship**, and **Beneficially Owned Company** refer to the [Insta Retail Onboarding - Financial Information](#) section.

3

KYC Management

Party KYC information refers to the data and details collected by financial institutions to fulfill their Know Your Customer (KYC) obligations. KYC is a regulatory requirement that requires businesses, especially those in the financial industry, to verify and understand the identity of their customers. This process is designed to prevent fraud, money laundering, and other illicit activities by ensuring that financial institutions have accurate and up-to-date information about the individuals or entities they are dealing with.

Financial institutions are required to periodically update and verify this information to ensure its accuracy. KYC processes not only help in meeting regulatory compliance but also contribute to the overall security of the financial system by mitigating the risks associated with financial crimes.

- [Create KYC](#)
Create KYC process allows user to create a KYC record for the party.
- [Update KYC](#)
Update KYC process allows user to update or amend a KYC record for the party.
- [View KYC](#)
View KYC process allows user to View or amend a KYC record for the party.

3.1 Create KYC

Create KYC process allows user to create a KYC record for the party.

To initiate the Create KYC:

Note:

The fields marked as **Required** are mandatory.

1. On the **Homepage**, under **Party Services**, click **KYC Management**.
2. Under **KYC Management**, click **Create**.

The **Create** screen is displayed.

Figure 3-1 KYC Management - Create

3. Specify the **CIF** or search for a **CIF**. For advance search, click **Advance Search** button. The following values are available for the advance CIF search:
 - Party ID

- First Name
 - Middle Name
 - Last Name
 - Data of Birth
 - Unique ID
 - Mobile Number
 - Email
4. Click **Submit**.

The **Standalone KYC Onboarding** screen is displayed.

Figure 3-2 Standalone KYC Onboarding

Basic Details

5. Under the **Party Information**, click and expand **Basic Details** segment.
6. Under the **Basic Details** segment, click **Edit** button on each widget to update the details. For more information on the **Basic Info and Citizenship**, **Current Address**, **ID Details**, and **Contact Details** widgets, refer to the [Onboarding Initiation - Basic Details](#) section.

Note:

Creation of a KYC record for a minor customer is not allowed.

Additional Information

7. Under the **Party Information**, click and expand **Additional Information** segment.
8. Under the **Additional Information** segment, click **Edit** on the **Politically Exposed Person** widget.

The **Additional Information** pop-up screen is displayed.

9. On the **Additional Information** pop-up screen, specify the details. For more information on fields, refer to the [Insta Retail Onboarding - Additional Info](#) section.
10. Click **Next** button on the **Standalone KYC Onboarding** screen.

Oracle Banking Enterprise Party Management supports 13 different KYC checks as below:

- Address Check
- Identity Check
- Police DB Check
- Credit Score Check
- Education Qualification
- Field Verification
- Reference Check
- Suit Filed
- PEP Identification
- AML Check
- FATCA Check
- SDN Check
- Sanction Check

 **Note:**

The KYC checks are listed during KYC stage, based on KYC maintenance. Refer to the **Party Onboarding Configuration User Guide** for the KYC maintenance details. **PEP Identification** check is displayed, if a customer is determined as Politically Exposed Person (PEP) in the **Additional Info** segment.

The **KYC Information** screen is displayed.

11. Click **Verify** button on each KYC check to verify the details. For more information on the fields, refer to the [KYC Check](#) section.

 **Note:**

If any of the **KYC Check** is configured as automated in KYC maintenance, respective, KYC details will be auto populated based on the information provided.

12. Click **Submit** after completing all the KYC checks.

The KYC reference number will be generated.

3.2 Update KYC

Update KYC process allows user to update or amend a KYC record for the party.

To initiate the update KYC:

 **Note:**

The fields marked as **Required** are mandatory.

1. On the **Homepage**, under **Party Services**, click **KYC Management**.
2. Under **KYC Management**, click **Update**.
The **Update** screen is displayed.

Figure 3-3 Update

3. Enter **KYC Reference Number** or click **Search** icon to fetch the **KYC Reference Number**.

 **Note:**

For more information on the **KYC Reference Number**, refer to the [KYC Check](#) section.

4. Click **Amend Now**.
The **Standalone KYC Amend** screen is displayed.

Party Information

The party information will be available only in the view mode and cannot be amended.

5. On the **Standalone KYC Amend** screen, click and expand **Basic Details** segment.
6. Under the **Basic Details** segment, click **View** on each widget to view the details. For more information on the **Basic Info & Citizenship**, **Current Address**, **ID Details**, and **Contact Details**, refer to the [Onboarding Initiation - Basic Details](#) section.
7. On the **Standalone KYC Amend** screen, click and expand **Additional Information** segment.
8. Under the **Basic Details** segment, click **View** on each widget to view the details. For more information on the **Politically Exposed Person** widget, refer to the [Insta Retail Onboarding - Additional Info](#) section.

KYC Information

9. On the **Standalone KYC Amend** screen, click **Next**.
The **KYC Information** screen is displayed.
10. Click **Edit** icon on the each widget to update the KYC details. For more information on the fields, refer to the [KYC Check](#) section.

3.3 View KYC

View KYC process allows user to View or amend a KYC record for the party.

To initiate the View KYC:

1. On the **Homepage**, under **Party Services**, click **KYC Management**.
2. Under **KYC Management**, click **View**.
The **View** screen is displayed.

Figure 3-4 View KYC

3. Enter **KYC Reference Number** or click **Search** icon to fetch the **KYC Reference Number**.

 **Note:**

For more information on the **KYC Reference Number**, refer to the [Create KYC](#) section.

4. Click **View Now**.

The **Standalone KYC View** screen is displayed.

Party Information

The party information will be available only in the view mode and cannot be amended.

5. On the **Standalone KYC Amend** screen, click and expand **Basic Details** segment.
6. Under the **Basic Details** segment, click **View** on each widget to view the details. For more information on the **Basic Info & Citizenship**, **Current Address**, **ID Details**, and **Contact Details**, refer to the [Onboarding Initiation - Basic Details](#) section.
7. On the **Standalone KYC View** screen, click and expand **Additional Information** segment.
8. Under the **Basic Details** segment, click **View** on each widget to view the details. For more information on the **Politically Exposed Person** widget, refer to the [Insta Retail Onboarding - Additional Info](#) section.

KYC Information

9. On the **Standalone KYC Amend** screen, click **Next**.
The **KYC Information** screen is displayed.
10. Click **Edit** icon on each widget to View the KYC details. For more information on the fields, refer to the [KYC Check](#) section.

4

Party Memo

Party memo feature is to support capturing of notes and memos related to a party.

To initiate the party memo process:

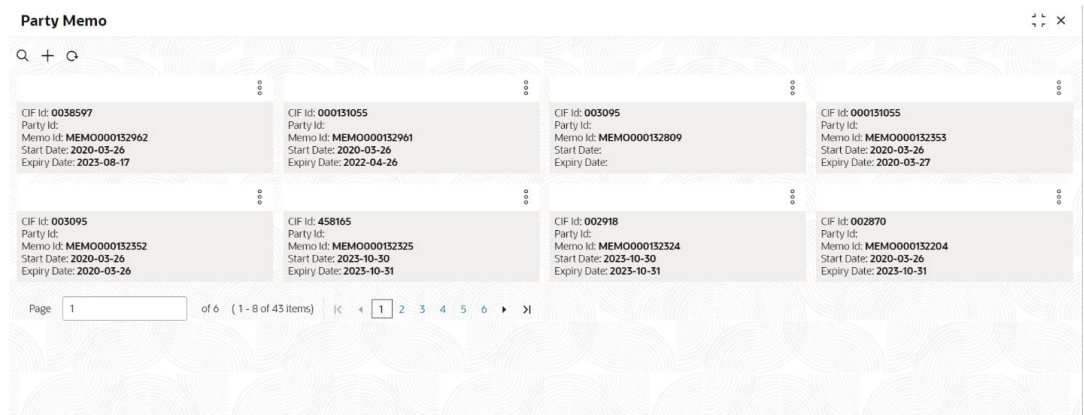

Note:

The fields marked as **Required** are mandatory.

1. On the **Homepage**, under **Party Services**, click **Party Memo**.
The **Party Memo** screen is displayed.

Figure 4-1 Party Memo

2. On the **Party Memo** screen, click  icon.
The **Add Memo** pop-up screen is displayed.

Figure 4-2 Add Memo

The 'Add Memo' pop-up screen contains the following fields and controls:

- CIF Id:** Text input field with a search icon and 'Required' label.
- Advanced Search:** Button below the CIF Id field.
- Memo Type:** Dropdown menu with 'Required' label.
- Memo Category:** Dropdown menu with 'Required' label.
- Start Date:** Date picker field with 'Required' label.
- Expiry Date:** Date picker field with 'Required' label.
- Memo:** Large text area for entering the memo content, with 'Required' label.
- Buttons:** 'Add', 'Reset', and 'Cancel' buttons at the bottom right.

- On the **Add Memo** pop-up screen, specify the details about a memo. For more information fields, refer to the field description table.

Table 4-1 Add Memo - Field Description

Field	Description
CIF Id	Enter CIF ID of the party.
Memo Type	<p>Select the memo type the list of values. The available options are:</p> <ul style="list-style-type: none"> Information Action <p> Note:</p> <p>The list of values can be configured through entity maintenance.</p>
Memo Category	<p>Select the category of a memo from the list of values. The available options are:</p> <ul style="list-style-type: none"> Warning Override <p> Note:</p> <p>The list of values can be configured through entity maintenance.</p>
Start Date	Select start date of a memo.
Expiry Date	Select expiry date of a memo.
Memo	Specify the content of a memo.

- Click **Add** to save memo for the party.

 **Note:**

Click **Reset** to clear all the fields.

5

Last Contact Date

The **Last Contact Date** feature allows user to view when a customer has contacted financial institution last time.

The **Last Contact Date** is updated automatically as when a party is inquired or amended in party management or any other product such as account origination, account servicing, etc.,

The **Last Contact Date** is available in the [Retail View](#) section.

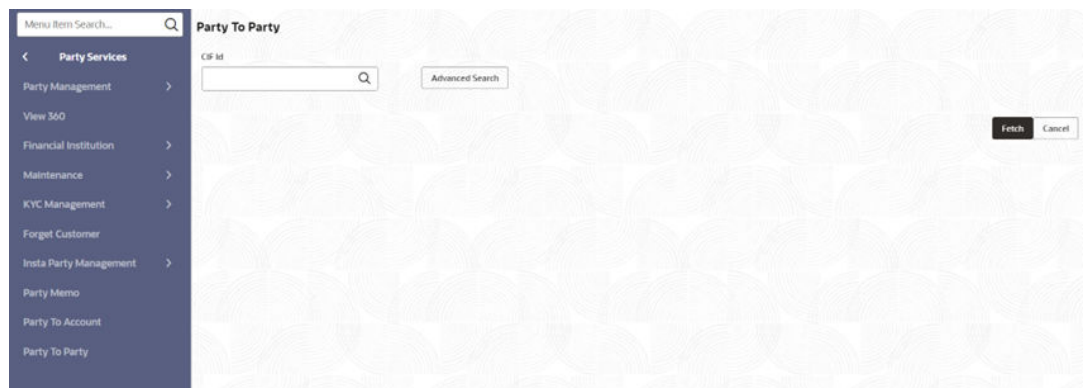

6

Party to Party Relationship

This topic provides the instruction to create retail party to party relationship details.

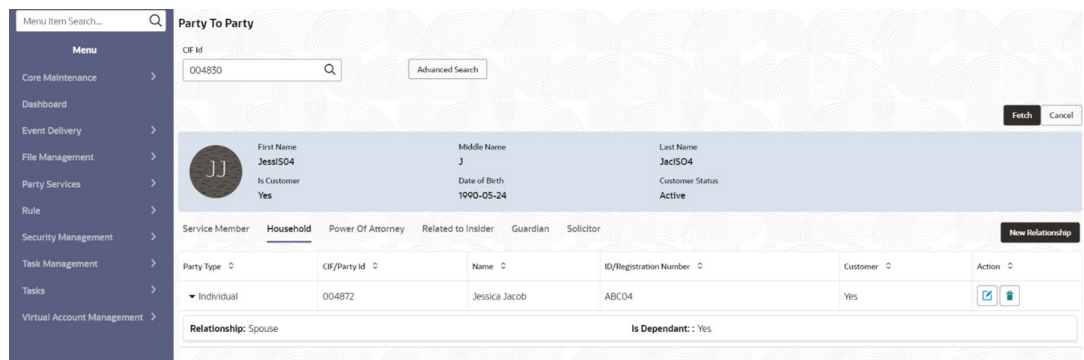

1. On **Homepage**, under **Party Services**, click **Party To Party**.
The **Party To Party** screen is displayed.

Figure 6-1 Party To Party

2. Input CIF ID or search for CIF ID of the primary party using **Party Search**. For more information, refer to the [Party Search](#).
3. Click **Fetch**.
The primary party details will be displayed.

Figure 6-2 Primary Details

Related To provides the view, of all the related parties of the primary party searched using the CIF ID.

- 4.
5. Select related to and required relationship type to view related parties.

 **Note:**

Party type determines the relationship type, be it retail or SMB.

- Related parties will be displayed in the grid with following details.

Table 6-1 Related Details - Field Description

Field	Description
Party Type	Party type of related party.
CIF ID	CIF ID of the related party.
Name	Name of the related party.
Customer	Flag to identify, if party is a customer or non-customer.
Relationship Added Date	Date when party to party relationship is added.

- Click in the action column to delete, and edit Party to Party Relationship.

Create a New Relationship

- Click **New Relationship** to create a new party to party relationship for the selected CIF and relationship type.

Drawer will open to capture new relationship details.

- Input CIF ID or search for CIF ID of the related party using **Party Search**. For more information, refer to the [Party Search](#).
- Click **Fetch**.

The related party details will be displayed.

Figure 6-3 Related Party

The screenshot shows the Oracle Party To Party interface. On the left is a navigation menu with options like Core Maintenance, Dashboard, and Party Services. The main area displays a search for CIF ID 004830. Below the search, a profile card for Jessica Jacob (CIF ID: JacISO4, Date of Birth: 1990-05-24) is shown. The 'Household' tab is selected, showing a table of relationships. A modal titled 'Add Household' is open on the right, showing search results for CIF ID 004872 (Jessica Jacob) and relationship attributes like 'Spouse' and 'Is Dependent: Yes'.

- Input relationship attributes specific to party to party relationship. Refer table from [Table 1-16](#) to [Table 1-21](#) for relationship specific attributes for retail party relationships.

Refer to the **Small and Medium Business Onboarding Guide** for relationship specific attributes for SMB Party Relationship.

- Click **Save**.

Related With provides the view, where a party is related as a relationship.

13. Select **Related With** with required relationship and party type as retail or **SMB** to view related with parties.

 **Note:**

Party type determines the relationship type, be it retail or SMB.

14. Related parties will be displayed in the grid with following details.

Table 6-2 Realated Details - Field Description

Field	Description
Party Type	Party type of related party.
CIF ID	CIF ID of the related party.
Name	Name of the related party.
Customer	Flag to identify, if party is a customer or non-customer.
Relationship Added Date	Date when party to party relationship is added.

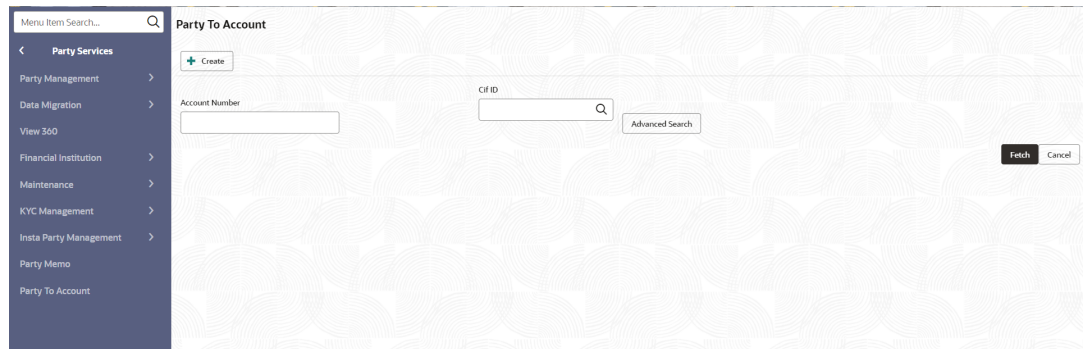

7

Party to Account Relationship

This topic provides the instruction to create party to account relationship details.

1. On **Homepage**, under **Party Services**, click **Party To Account**.
The **Party To Account** screen is displayed.

Figure 7-1 Part to Account

Create Party to Account Relationship

2. Click **Create** button from the **Party to Account** screen to create a new relationship.
The **Add Relationship** screen is displayed to update the relationship details.

Figure 7-2 Party to Account - Add Relationship

3. Specify the fields on **Add Relationship** screen.
For more information on fields, refer to the field description table below.

Table 7-1 Add Relationship - Field Description

Note:

The account relationship with **Account Number** will provide a list of all parties associated with the account. A party performing a search with their **CIF ID** will reveal all accounts linked to them.

- Click **Edit** icon in the action column to amend or delete an existing party to account relationship.

 **Note:**

CIF ID and **Account Number** cannot be changed during amendment.

The drawer will open to amend the relationship.

8

Straight Through Processing for Onboarding Requests Received from Channels

Configurations are available for the onboarding requests received from channels to allow straight-through processing of retail onboarding and handoff to the core system without waiting for any manual intervention.

Configurations

The details of the configuration parameters are as follows:

Table 8-1 Configuration Details

Configuration Parameter	Description	Default Value
STP_FLAG	This parameter indicates whether the straight-through processing is allowed for retail onboarding requests received from the channels that are subject to other mandatory information being available in the request. Accepted values are: TRUE - Straight-through processing for Retail Onboarding shall be allowed subject to fulfillment of other mandatory details and business validation. FALSE - Straight-through processing for Retail Onboarding shall not be allowed in any case, even if all mandatory and KYC details are sent from the channel.	TRUE
CHANNEL_CONFIRMATION_REQUIRED	This parameter indicates whether confirmation from the channel is required before handoff to the core system. Accepted values are: TRUE – The system will wait for a confirmation from the channels before triggering the handoff to the core system FALSE – The system will go ahead with the handoff to the core system without waiting for any confirmation from the channels	FALSE

Process

On receiving the retail onboarding request from channels, the system will validate the configuration parameters as stated in the above table. If straight-through processing is allowed (STP_FLAG is set to TRUE), the system validates if all the mandatory information including the KYC details are available in the request. The following cases are applicable:

Table 8-2 Applicable Cases

Use Case	Description
Quick Onboarding	This case will be a quick onboarding with minimal attributes, equivalent to Quick Initiation. Further enrichment and KYC check for such requests can be done by a bank user.
Detailed Onboarding without KYC Check	This case will cover onboarding from the channel with full customer details without KYC checks. Such requests shall fall under the KYC stage. Bank users can pick such requests and complete the remaining stages - <i>KYC, Review, and Approval</i> .
Detailed Onboarding with KYC Check (Straight-through processing)	In this case, the channel will capture and pass on all the mandatory information and KYC details. This shall be treated as straight-through processing if <code>STP_FLAG</code> is set to <code>TRUE</code> and the Party details shall be handed over to the core system without the need of any manual intervention.

9

Onboarding a Customer with No KYC Details

This topic provides the information about the onboarding a customer with No KYC Details.

For requests originating from self-service channels where KYC details are not provided, the customer onboarding process needs to be completed without the KYC details to allow opening instantaneous accounts. In these cases, the system allows onboarding a new customer without the KYC details.

The customer onboarding request received from the channel will contain a flag to indicate that this request is for onboarding a customer with no KYC details.

A grace period will be allowed to the customer during which the customer can submit the KYC-related documents to the bank. The duration of the grace period will be configurable and can be set as per the need of the Bank. If the customer submits all the KYC documents within the grace period, the KYC status updates as compliant, subject to verification of the details provided.

However, if the customer fails to submit the required documents within the stipulated timeframe, then the system will generate a notification a few days before the expiration of the grace period. The duration for generation of notification and frequency for generation of notification will be configurable. This notification can be used to prompt the customer for furnishing the KYC details before the end of the grace period. If the customer still fails to submit the documents, the KYC status for such customers is updated as *Non-Compliant*, and the same will be sent to the back-office product processor.

 **Note:**

Oracle Banking Enterprise Party Management will only be generating the notification. Capturing this notification to send correspondence to the customer shall be taken up as an implementation activity.

10

Duplication Check (De-dupe Check)

Duplication check (De-dupe Check) screen is to check for the duplication in the party.

System will check for duplicate customers (Dedupe Check).

- If there is no duplicate customer existed in the system, then system creates unique party ID.
- If there is a duplicate customer/s existed in the system, then system will display the list of customers with same name. User will have facility to
 - **Discard** the Customer Onboarding or
 - Go ahead and **save** it or
 - **Cancel** and go back to previous screen

For example, if there is a customer by name “Vinay” and user will try to create a customer with the same name again. Then the system will display duplicate record as below.

Figure 10-1 Duplication Check

The screenshot shows a window titled "Duplication Check" with a close button (X). Below the title bar, it says "Following matching records are found. Please verify". There is a search filter for "Business Type" set to "Individual". Below this is a table with the following columns: Business Type, CIF, Party ID, Name, ID / Registration Number, Date of Birth / Registration Date, and Status. The table contains one row: Individual, 000009953, VINAY, and IN_PROGRESS. Below the table, it says "Page 1 of 1 (1 of 1 items)" with navigation arrows. There is a "Comments" field and three buttons: "Abort", "Continue", and "Cancel".

Business Type	CIF	Party ID	Name	ID / Registration Number	Date of Birth / Registration Date	Status
Individual		000009953	VINAY		1992-02-06	IN_PROGRESS

- Dedupe check will fetch the matches found against the
 - Information of existing customers present in the system
 - Information of the customers for whom the onboarding application was denied/rejected
- By default, the system validates based on customer first name. If other attributes required for dedupe check that can be configured.
- Dedupe check will be performed as a service.

11

Party Search

Oracle Banking Party supports two search mechanisms. They are as follows:

- CMC Search – Party search from Common Core - External Customer
- Advance Search – Party search using various parameters based on party type from the information available within Oracle Banking Party.
- [Common Core - External Customer](#)
This topic provides the instruction to search the core functionalities among the parties.
- [Advance Search](#)
This topic provides the instruction about advanced search features in Oracle Banking Party.

11.1 Common Core - External Customer

This topic provides the instruction to search the core functionalities among the parties.

The Core search functionality allows users to search among the parties listed in the Common Core – External Customer.

The **Search** icon is provided at the relevant location, indicating where the search for external customers is permitted.

- Upon clicking the **Search** icon, the customer search screen becomes accessible, and providing users with the means to conduct searches for external customers.

Figure 11-1 Common core -External Customer

The screenshot shows a web interface titled "Select Customer" with a close button (X) in the top right corner. Below the title are three input fields: "Customer Id", "Customer Name", and "Customer Category". A "Fetch" button is located below the "Customer Id" field. Below the input fields is a table with three columns: "Customer Id", "Customer Name", and "Customer Category". The table is currently empty, and the text "No data to display." is shown below the table. At the bottom of the interface, there is a pagination control showing "Page 1 of 0 (1 - 0 of 0 items)" and navigation arrows.

 **Note:**

Common Core – External Customer search provides results for all the parties irrespective of Party type.

11.2 Advance Search

This topic provides the instruction about advanced search features in Oracle Banking Party.

The Advanced Search feature facilitates party searches within the Oracle Banking Party (OBPY) information by utilizing various parameters based on Party type.

An **Advanced Search** button is conveniently located where advanced party searches are permitted.

- Click on the **Advanced Search** button, grants access to the customer search screen, it enable the users to conduct comprehensive searches for parties based on specified criteria.

Figure 11-2 Advanced Search

Individual Non-Individual

Party Id:
 First Name:
 Middle Name:

Port Of Issue	Optional	Optional	Optional	VARCHAR2 (250)
Visa Issue Date	Optional	Optional	Optional	DATE (7)
Visa Expiry Date	Optional	Optional	Optional	DATE (7)
Remarks	Optional	Optional	Optional	VARCHAR2 (250)

Dates

The regional configuration for **Dates** data segment is appended as below.

Table A-8 Dates

Field	Product Configuration	Regional Configuration		Data Type & Length
		US	Rest of the World	
Date Type	Mandatory	Mandatory	Mandatory	VARCHAR2 (3)
Date	Optional	Optional	Optional	DATE (7)

Social Profile

The regional configuration for **Social Profile** data segment is appended as below.

Table A-9 Social Profile

Field	Product Configuration	Regional Configuration		Data Type & Length
		US	Rest of the World	
Facebook	Optional	Optional	Optional	VARCHAR2 (255)
Twitter	Optional	Optional	Optional	VARCHAR2 (255)
Instagram	Optional	Optional	Optional	VARCHAR2 (255)
Linkedin	Optional	Optional	Optional	VARCHAR2 (255)
Blog	Optional	Optional	Optional	VARCHAR2 (255)
Tumblr	Optional	Optional	Optional	VARCHAR2 (255)

Educational Qualification

The regional configuration for **Educational Qualification** data segment is appended as below.

Table A-10 Educational Qualification

Field	Product Configuration	Regional Configuration		Data Type & Length
		US	Rest of the World	
Education Type	Mandatory	Mandatory	Mandatory	VARCHAR2 (3)
Course	Mandatory	Mandatory	Mandatory	VARCHAR2 (55)
Specialization	Optional	Optional	Optional	VARCHAR2 (55)
University/ Institute	Optional	Optional	Optional	VARCHAR2 (105)
Date of Completion	Mandatory	Mandatory	Mandatory	DATE (7)
Is Highest Degree	Mandatory	Mandatory	Mandatory	VARCHAR2 (1)

Household Relationship

The regional configuration for **Household Relationship** data segment is appended as below.

Table A-11 Household Relationship

Field	Product Configuration	Regional Configuration		Data Type & Length
		US	Rest of the World	
Relationship	Mandatory	Mandatory	Mandatory	VARCHAR (3)
Is Dependent	Mandatory	Mandatory	Mandatory	VARCHAR (2)

Power or Attorney Relationship

The regional configuration for **Power or Attorney Relationship** data segment is appended as below.

Table A-12 Power or Attorney Relationship

Field	Product Configuration	Regional Configuration		Data Type & Length
		US	Rest of the World	
Associated Since	Mandatory	Mandatory	Mandatory	DATE (7)
Preferred	Mandatory	Mandatory	Mandatory	VARCHAR (2)

Service Member Relationship

The regional configuration for **Service Member Relationship** data segment is appended as below.

Table A-13 Service Member Relationship

Field	Product Configuration	Regional Configuration		Data Type & Length
		US	Rest of the World	
Relationship	Mandatory	Mandatory	Mandatory	VARCHAR (3)
MLA Covered	Mandatory	Mandatory	Mandatory	VARCHAR (2)

Related to Insider Relationship

The regional configuration for **Related to Insider Relationship** data segment is appended as below.

Table A-14 Related to Insider Relationship

Field	Product Configuration	Regional Configuration		Data Type & Length
		US	Rest of the World	
Relationship	Mandatory	Mandatory	Mandatory	VARCHAR (3)

Guardian Relationship

The regional configuration for **Guardian Relationship** data segment is appended as below.

Table A-15 Guardian Relationship

Field	Product Configuration	Regional Configuration		Data Type & Length
		US	Rest of the World	
Relationship	Mandatory	Mandatory	Mandatory	VARCHAR (3)
Preferred	Mandatory	Mandatory	Mandatory	VARCHAR (1)

Custodian Relationship

The regional configuration for **Custodian Relationship** data segment is appended as below.

Table A-16 Custodian Relationship

Field	Product Configuration	Regional Configuration		Data Type & Length
		US	Rest of the World	
Relationship	Mandatory	Mandatory	Mandatory	VARCHAR (3)
Preferred	Mandatory	Mandatory	Mandatory	VARCHAR (1)

Solicitor Relationship

The regional configuration for **Solicitor Relationship** data segment is appended as below.

Table A-17 Solicitor Relationship

Field	Product Configuration	Regional Configuration		Data Type & Length
		US	Rest of the World	
Registration Number	Mandatory	Mandatory	Mandatory	VARCHAR (3)
Preferred	Mandatory	Mandatory	Mandatory	VARCHAR (1)
Remarks	Optional	Optional	Optional	VARCHAR (255)

Salaried

The regional configuration for **Salaried** data segment is appended as below.

Table A-18 Salaried

Field	Product Configuration	Regional Configuration		Data Type & Length
		US	Rest of the World	
Employer Code	Mandatory	Mandatory	Mandatory	VARCHAR2 (105)
Employer Name	Optional	Optional	Optional	VARCHAR2 (105)
Employer Description	Optional	Optional	Optional	VARCHAR2 (256)
Organization Category	Mandatory	Mandatory	Mandatory	VARCHAR2 (3)
Demographics	Mandatory	Mandatory	Mandatory	VARCHAR2 (105)
Employee type	Optional	Optional	Optional	VARCHAR2 (3)
Employee ID	Optional	Optional	Optional	VARCHAR2 (21)
Employment Start Date	Mandatory	Mandatory	Mandatory	DATE (7)
Employment End Date	Optional	Optional	Optional	DATE (7)
Grade	Optional	Optional	Optional	VARCHAR2 (105)
Designation	Optional	Optional	Optional	VARCHAR2 (105)
I currently work in this role	Mandatory	Mandatory	Mandatory	VARCHAR2 (1)
Industry type	Optional	Optional	Optional	VARCHAR2 (4)

Consent & Preferences

The regional configuration for **Consent & Preferences** data segment is appended as below.

Table A-19 Consent & Preferences

Field	Product Configuration	Regional Configuration		Data Type & Length
		US	Rest of the World	
E-Sign Consent	Optional	Optional	Optional	VARCHAR2 (1)
Consent to receive Marketing, Promotional, Sales and other	Mandatory	Mandatory	Mandatory	VARCHAR2 (1)
Channel	Mandatory	Mandatory	Mandatory	VARCHAR2 (255)
Contact	Mandatory	Mandatory	Mandatory	VARCHAR2 (255)
Preferred Time	Mandatory	Mandatory	Mandatory	VARCHAR2 (255)
Privacy Information	Optional	Optional	Optional	VARCHAR2 (255)
Minor Consent	Optional	Optional	Optional	DATE (7)

Additional Info

The regional configuration for **Additional Info** data segment is appended as below.

Table A-20 Additional Info

Field	Product Configuration	Regional Configuration		Data Type & Length
		US	Rest of the World	
Insider	Optional	Optional	Optional	VARCHAR2 (1)
Role	Optional	Optional	Optional	VARCHAR2 (250)
Remarks	Optional	Optional	Optional	VARCHAR2 (250)
