## Purpose

This guide provides step-by-step instructions to onboard a Small and Medium Business (SMB) customer using Oracle Banking Enterprise Party Management.

## Audience

This guide is intended for the bankers who are responsible for onboarding SMB customers into the bank.

## Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

### **Access to Oracle Support**

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

## Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

## Conventions

The following text conventions are used in this document:

Convention	Meaning

## Party Management

SMB Onboarding is an umbrella term that is often used to describe the entire process that users go through when they start their journey as a customer of a banking product or service.

### Topics

- [Small & Medium Business Onboarding](#)  
SMB Onboarding is the process of collecting, evaluating, and authorizing customer information for secured banking operations.
- [Amendment](#)  
In the **Amendment** stage, the relationship manager can amend the information or can add additional information about an SMB customer using Oracle Banking Enterprise Party Management.

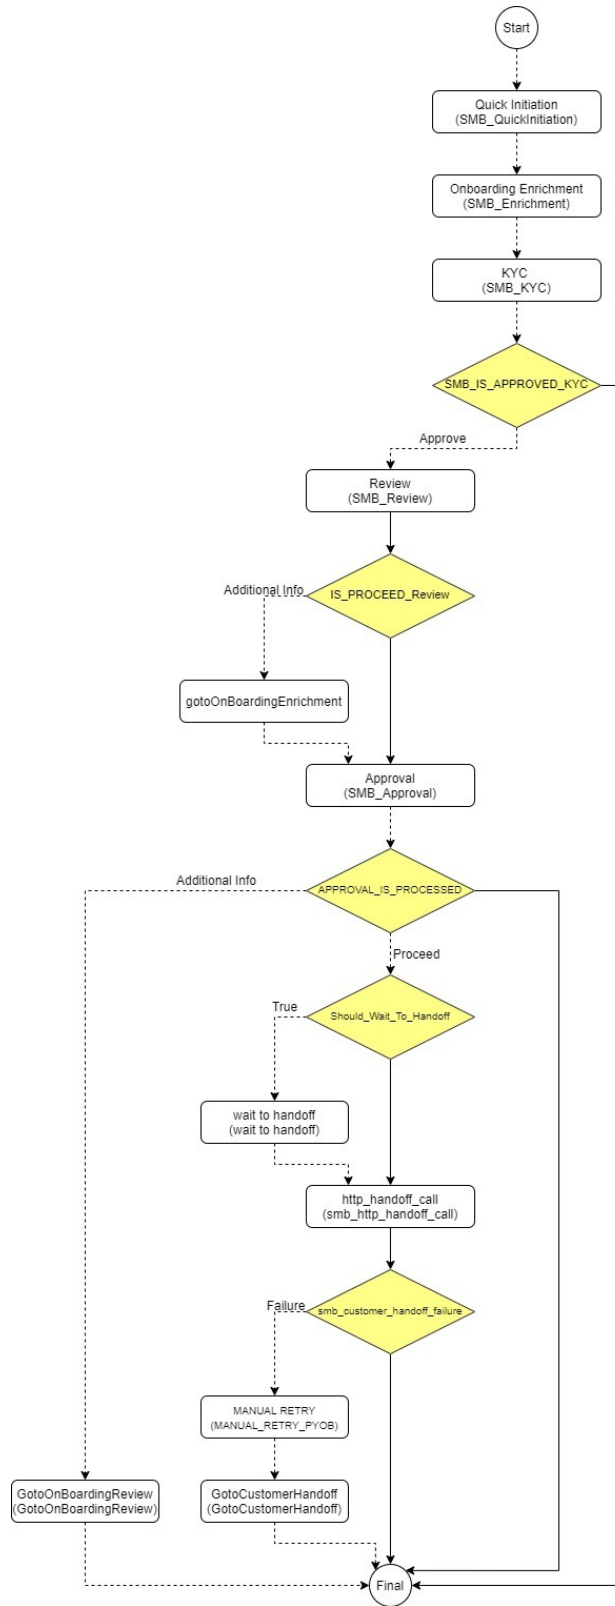

### 1.1 Small & Medium Business Onboarding

SMB Onboarding is the process of collecting, evaluating, and authorizing customer information for secured banking operations.

The Relationship Managers (RM) can initiate this process when the customer shows interest in any of the bank's products or approaches the bank for an availing facility. The information collected throughout this process is stored in the bank's database for future reference.

The flow diagram illustrates the different stages in the Small and Medium Business Onboarding process is shown below for reference:

Figure 1-1 Process Flow

- **Onboarding Initiation**  
In the *Initiation* stage, the RM can capture brief information about the Small and Medium Business customer to be onboarded using Oracle Banking Enterprise Party Management.
- **Onboarding Enrichment**  
In the Enrichment stage, the relationship manager can capture detailed information about the SMB customer to be added in the Oracle Banking Enterprise Party Management.
- **KYC Check**  
KYC check for the SMB customer is populated based on the product selected by that customer. The banks can directly perform the KYC check by themselves or reach external agencies for the KYC information.
- **Recommendation**  
In this stage, the final Recommendation user reviews the customer details and moves the task to Approval stage if the details are appropriate.
- **Approval**  
In the **Approval** stage, the head of the division can view the customer information and decide to approve or reject the task based on comments from the Reviewer.

## KYC Management

Financial institutions collect Party KYC information to fulfill their Know Your Customer (KYC) obligations. Businesses, particularly those in the financial industry, are required by regulatory requirement KYC to verify and understand the identities of their customers.

Financial institutions ensure accurate and up-to-date information about individuals or entities to prevent fraud, money laundering, and other illicit activities during their dealings. Financial institutions must periodically update and verify this information to ensure its accuracy. The overall security of the financial system is enhanced, and regulatory compliance is met through the implementation of KYC processes. They mitigate the risks associated with financial crimes.

## Duplication Check (De-dupe Check)

Duplication check (De-dupe Check) screen is to check for the duplication in the party.

System will check for duplicate customers (Dedupe Check).

- If there is no duplicate customer existed in the system, then system creates unique party ID.
- If there is a duplicate customer/s existed in the system, then system will display the list of customers with same name. User will have facility to
  - **Discard** the Customer Onboarding or
  - Go ahead and **save** it or
  - **Cancel** and go back to previous screen

For example, if there is a customer by name “Vinay” and user will try to create a customer with the same name again. Then the system will display duplicate record as below.

**Figure 4-1 Duplication Check**

The screenshot shows a window titled "Duplication Check" with a close button (X) in the top right corner. Below the title bar, it says "Following matching records are found. Please verify". There is a search filter for "Business Type" set to "Individual". Below this is a table with the following columns: "CIF", "Party ID", "Name", "ID / Registration Number", "Date of Birth / Registration Date", and "Status". The table contains one row with the following data: "000009953", "VINAY", and "1992-02-06". The status is "IN PROGRESS". Below the table, it says "Page 1 of 1 (1 of 1 items)" with navigation arrows. There is a "Comments" field with an asterisk and a text area. At the bottom right, there are three buttons: "Abort", "Continue", and "Cancel".

CIF	Party ID	Name	ID / Registration Number	Date of Birth / Registration Date	Status
	000009953	VINAY		1992-02-06	IN PROGRESS

- Dedupe check will fetch the matches found against the
  - Information of existing customers present in the system
  - Information of the customers for whom the onboarding application was denied/rejected
- By default, the system validates based on customer first name. If other attributes required for dedupe check that can be configured.
- Dedupe check will be performed as a service.

## Straight Through Processing for Onboarding Requests Received from Channels

Configurations are available for the onboarding requests received from channels to allow straight-through processing of SMB onboarding and handoff to the core system without waiting for any manual intervention.

### Configurations

The details of the configuration parameters are as follows:

Configuration Parameter	Description	Default Value
STP_FLAG	This parameter indicates whether the straight-through processing is allowed for SMB onboarding requests received from the channels that are subject to other mandatory information being available in the request. Accepted values are:  TRUE - Straight-through processing for SMB Onboarding shall be allowed subject to fulfillment of other mandatory details and business validation.  FALSE - Straight-through processing for SMB Onboarding shall not be allowed in any case, even if all mandatory and KYC details are sent from the channel.	TRUE
CHANNEL_CONFIRMATION_REQUIRED	This parameter indicates whether confirmation from the channel is required before handoff to the core system. Accepted values are:  TRUE – The system will wait for a confirmation from the channels before triggering the handoff to the core system  FALSE – The system will go ahead with the handoff to the core system without waiting for any confirmation from the channels	FALSE

### Process

On receiving the SMB onboarding request from channels, the system will validate the configuration parameters as stated in the above table. If straight-through processing is allowed (STP\_FLAG is set to TRUE), the system validates if all the mandatory information including the KYC details are available in the request. The following cases are applicable:

Use Case	Description
Quick Onboarding	This case will be a quick onboarding with minimal attributes, equivalent to Quick Initiation. Further enrichment and KYC check for such requests can be done by a bank user.

---

Use Case	Description
Detailed Onboarding without KYC Check	This case will cover onboarding from the channel with full customer details without KYC checks. Such requests shall fall under the KYC stage. Bank users can pick such requests and complete the remaining stages - <b>KYC</b> , <b>Review</b> , and <b>Approval</b> .
Detailed Onboarding with KYC Check (Straight-through processing)	In this case, the channel will capture and pass on all the mandatory information and KYC details. This shall be treated as straight-through processing if <code>STP_FLAG</code> is set to <code>TRUE</code> and the Party details shall be handed over to the core system without the need of any manual intervention.
