

New Features Described in Oracle JET's Documentation for Release 18.1.0

Here are updates to the documentation for Oracle JET to describe new features and enhancements added to Release 18.1.0.

For other changes in this release, see the product [Release Notes](#).

Oracle JET

Documentation updates for this release of Oracle JET.

- **Conditional rendering of slot content**
Children and Slot Content has been revised to recommend conditionally rendering content inside a slot, rather than conditionally rendering the slot itself, wherever possible.
- **Migrating to Oracle JET Core Pack components**
Migrate Oracle JET Legacy Components to Core Pack Components has been added. It describes how to migrate Oracle JET legacy components (`oj-*`) to their Core Pack equivalents (`oj-c-*`) with the migrator that is packaged in the Oracle JET Audit Framework. This migrator can also update Selenium WebDriver test files written for apps with legacy components, so they work with Core Pack components.
- **Reference documentation for test adapters**
Reference documentation for the test adapters that facilitate the testing of Oracle JET apps that use legacy and Core Pack components is now published in the Oracle JET documentation library. See [Oracle JET Test Adapters Reference for Core Pack Components](#) and [Oracle JET Test Adapters Reference for Legacy Components](#). For information about how to perform end-to-end testing of an Oracle JET app, see [Set up an environment to create UI automation tests for Oracle JET web apps](#).
- **Develop Accessible Oracle JET Apps** has been revised to remove out-of-date content, and to note that Oracle JET's accessibility support conforms to the Web Content Accessibility Guidelines version 2.2 at the AA level (WCAG 2.2 AA).

Migration Information

Note the following change that affect JET apps that you migrate to Release 18.1.0:

See the following sections for step-by-step information about migrating your app to this release of Oracle JET.

- Migrate Alta-themed Applications from Releases Prior to 8.3.0 to Release 18.1.0 describes migration steps from releases prior to release 8.3.0 that allow migrating apps to the latest release.
- Migrate to the Redwood Theme CSS updated to describe how to migrate an Alta-themed app to the Redwood theme. As the topic describes, starting in release 9.0.0 it is possible to migrate to the Redwood theme.
- Migrate Redwood-themed Apps from Releases 9.x.0 or Later to Release 18.1.0 describes migration steps for Oracle JET app sources from version 9.x.0 or newer to the latest release.

Oracle JET Audit Framework

A new version of the Oracle JET Audit Framework (JAF) is included in this release of Oracle JET.

It includes bug fixes. It does not include new rules. See [Getting Started with the Oracle JET Audit Framework](#) and run `ojaf --help` to learn more about JAF. Run `ojaf --version` to view the JAF version that you have. See the [documentation for Release 18.0.0](#) to view a summary of the changes in the last release of JAF that included new rules and other enhancements.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.
