This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle®, Java, and MySQL are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

Solution Configuration Manager Release 2.0

This document contains important information about the 2.0 release of the Solution Configuration Manager (SCM). It contains descriptions of the new features, enhancements, and bug fixes.

New Features

SCM 2.0 Product Enhancement List

Feature	Description
Table Locking Notifications	<p>SCM 2.0 has been enhanced to display notification texts when tables are locked for editing, during the following user actions:</p> <ul style="list-style-type: none"> - Pop-up notification during login and logout. - Notification text on screens when viewing a table which is currently locked.
Security Enhancements	<ul style="list-style-type: none"> - Enhanced the SCM Installer to support TLS 1.2. - Included the latest OLE DB provider for SQL Server supporting TLS 1.2. - Added the ability to restrict sensitive information in packets from being migrated to other environments. - Masked the Password fields. - Upgraded to JQuery 3.5.
Configuration Packets	<ul style="list-style-type: none"> - Enhanced packet functionality that enables exporting and importing of configuration changes from previous versions into different solution environments. - Added the ability to import a configuration packet created in a previous version of SCM to SCM 2.0.
User Interface Enhancements	<ul style="list-style-type: none"> - Language selector is visible only if the language is not set to English. <p>The Manage Projects menu in the UI has been enhanced to improve navigation.</p> <ul style="list-style-type: none"> - Help text is now displayed below the configuration option frames as each option is selected. - Help text is also available when clicking the

	Help link as in previous versions.
Additional Enhancements	<ul style="list-style-type: none"> Error messages and trace log detail has been enhanced for more clarity.

Fixed Defects

SCM 1.3 to SCM 2.0 - Defect Correction List

Description
When filtering for packets Oracle- Packet Export enforces case sensitivity for login.
When attempting to upload a package with the same 'Package Type' within SCM the error message should be more user friendly.
Attempting to delete a project using Oracle throws an exception and the delete action fails.
Log injection possible as an unauthenticated user. Remove Language Drop-down on Login Screen.
Password policy message persists to appear on pages that are not relevant.
Inability to log on to SCM after configuring Windows authorization.
