

What's New for Oracle WebCenter Portal

Here's an overview of the new features, enhancements, and changes in Oracle WebCenter Portal.

Release 14c (14.1.2.0.0)

Feature	Description
Unified Search	Any document uploaded via Content Manager task flow in a Portal can now be searched without the need for Documents Crawl. Documents crawl has been removed. See <i>Configuring WebCenter Content for Search</i> in <i>Administering Oracle WebCenter Portal</i> .
WebCenter Portal on Kubernetes	You can create and manage Oracle WebCenter Portal instances on Kubernetes. See <i>Deploying and Managing Oracle WebCenter Portal on Kubernetes</i> .
Elasticsearch version	WebCenter Portal supports all minor versions of the Elasticsearch 7.x product version starting with 7.17 and newer. See <i>Configuring Elasticsearch in WebCenter Portal</i> in <i>Administering Oracle WebCenter Portal</i> .
Search Results UI	The Search Results user interface has been updated. When the search results are displayed, now the check boxes are displayed for each facet value for easy selection. See <i>Running a Global Search with Elasticsearch</i> in <i>Using Portals in Oracle WebCenter Portal</i> .
Filter search results using multiple values within a facet	Users of WebCenter Portal search will be able to filter the search results using multiple values within a facet, which means that once a value is selected within a facet, users can further filter the search based on other values in the same facet. See <i>Searching Using Elasticsearch</i> in <i>Using Portals in Oracle WebCenter Portal</i> .
Create and Manage Saved Search UI	Updated Create and Manage Saved Search UI to display search term and any facets selected for the search. See <i>Saving Search Results</i> in <i>Using Portals in Oracle WebCenter Portal</i> .
Polls and Surveys	With this release, the feature "Polls and Surveys" is available out-of-the-box when WebCenter Portal is installed. There is no longer a need to run the SQL scripts to enable this feature.

Feature	Description
Content Server selection in Content Manager Taskflow	If there are two or more Content Server connections, an option has been added in the Content Manager taskflow to select the connection to use. See <i>Enabling Document Management in Building Portals with Oracle WebCenter Portal</i> .

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.
