Preface

[Oracle Linux: Product Life Cycle Information](https://www.oracle.com/a/ocom/docs/elsp-lifetime-069338.pdf) provides information about product release life cycles that fall outside of the standard *Lifetime Support Policy: Coverage for Oracle Open Source Software* available at <https://www.oracle.com/a/ocom/docs/elsp-lifetime-069338.pdf>. Product life cycles describe the period for which Common Vulnerabilities and Exposures (CVEs) and bug fix updates are provided for different products that are available as part of the Oracle Linux offering.

In accordance with CC-BY-SA, if you distribute this content or an adaptation of it, you must provide attribution to Oracle and retain the original copyright notices.

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <https://www.oracle.com/corporate/accessibility/>.

Access to Oracle Support for Accessibility

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <https://www.oracle.com/corporate/accessibility/learning-support.html#support-tab>.

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

1

Application Stream Module Life Cycle

While the core operating system packages in the BaseOS repository for Oracle Linux 8 and Oracle Linux 9 retain a [standard Oracle Linux support life cycle](#), the separate AppStream packages have their own major version releases and might have shorter lifespans from 2 to 5 years.

Support for the AppStream packages is limited to package installation assistance only. Additional support for AppStream modules might be provided if references to these modules and their use are included in other official Oracle Linux documentation from Oracle. Critical security errata and select high-impact critical bug fixes are provided in the newer versions of AppStream packages.

For more information about Oracle Linux Application Streams, see [Oracle Linux: Managing Software on Oracle Linux](#).

Oracle Linux 9 Application Streams

The following tables list AppStream packages currently in Oracle Linux 9. As best practice, you should upgrade to the latest release of these packages as possible. Oracle continues to provide support for modules in the AppStream channel until the specified retirement date, as listed in the tables below.

Note:

Initial Application Streams released on Oracle Linux 9 are not released in modular format to simplify user experience. Therefore, when installing an initial Application Stream on Oracle Linux 9, you can use the `dnf install` command syntax without any need to reference a module.

Some Application Streams with shorter life cycles will be released in modular format with updated application stream versions in subsequent update releases.

Oracle Linux 9 Full Life Application Streams

Where possible, if there are multiple shorter-lived Application Streams offered, a single stream that extends the duration of the underlying Oracle Linux release may be offered.

Table 1-1 Oracle Linux 9 Full Life Application Streams Release Life Cycle

Module	Stream	Release Date	Retirement Date	Release
N/A	httpd 2.4	June 2022	June 2032	9.0
N/A	nginx 1.20	June 2022	June 2032	9.0
N/A	perl 5.32	June 2022	June 2032	9.0
N/A	php 8.0	June 2022	June 2032	9.0

Table 1-1 (Cont.) Oracle Linux 9 Full Life Application Streams Release Life Cycle

Module	Stream	Release Date	Retirement Date	Release
N/A	postgresql 13	June 2022	June 2032	9.0
N/A	python 3.9	June 2022	June 2032	9.0
N/A	ruby 3.0	June 2022	June 2032	9.0

Oracle Linux 9 Standard Application Streams

New versions of most Application Streams become available, as needed, during the Oracle Linux life cycle. Life cycles align to the upstream support life or to product needs as required. Multiple versions of the same Application Stream may be available at the same time with overlapping support durations.

Table 1-2 Oracle Linux 9 Application Stream Life Cycle

Module	Stream	Release Date	Retirement Date	Release
N/A	ansible-core	June 2022	November 2023	9.0
N/A	bind 9.18	November 2024	May 2027	9.5
N/A	dotnet 6	June 2022	November 2024	9.0
	dotnet 7	November 2022	May 2024	9.1
	dotnet 8	November 2023	November 2026	9.3
	dotnet 9	November 2024	May 2026	9.5
N/A	gcc-toolset 12	November 2022	November 2024	9.1
	gcc-toolset 13	November 2023	November 2025	9.3
	gcc-toolset 14	November 2024	November 2026	9.5
N/A	IDM	June 2022	May 2027	9.0
maven	maven 3.8	November 2022	November 2025	9.1
N/A	MySQL 8.0	June 2022	April 2026	9.0
nginx	nginx 1.22	May 2023	November 2025	9.2
	nginx 1.24	May 2024	May 2027	9.4
nodejs	nodejs 16	June 2022	April 2024	9.0
	nodejs 18	November 2022	April 2025	9.1
	nodejs 20	November 2023	April 2026	9.3
	nodejs 22	November 2024	April 2027	9.5
N/A	openjdk 1.8.0	June 2022	May 2026	9.0
	openjdk 11	June 2022	October 2024	9.0
	openjdk 17	June 2022	December 2027	9.0
	openjdk 21	November 2023	December 2029	9.3
php	php 8.1	November 2022	May 2025	9.1
	php 8.2	May 2024	May 2029	9.4
postgresql	postgresql 15	May 2023	May 2028	9.2
	postgresql 16	May 2024	May 2029	9.4
N/A	python 3.11	May 2023	May 2026	9.2

Table 1-2 (Cont.) Oracle Linux 9 Application Stream Life Cycle

Module	Stream	Release Date	Retirement Date	Release
	python 3.12	May 2024	Apr 2027	9.4
redis	redis 7	November 2023	November 2026	9.3
ruby	ruby 3.1	November 2022	March 2025	9.1
	ruby 3.3	May 2024	March 2027	9.4
N/A	Tomcat mod_jk connector for Apache	May 2022	May 2027	9.0

Oracle Linux 9 Rolling Application Streams

Rolling application streams are supported for the full life of the Oracle Linux 9 release. New versions of the streams replace existing versions in update releases. Rolling streams are only used when having new versions of the stream is very important. Users of rolling streams should understand when and how the streams are updated and be prepared for newer versions.

Rolling Application Stream	Release Date	Version
container-tools	May 2023	o19
Git	May 2023	2.39.1
GNU Autoconf	May 2024	2.71
GNU Make	November 2024	4.4.1
Go	November 2024	1.22.7
Java Mission Control	May 2023	7.1.1
LLVM	November 2024	18.1.8
Rust	November 2024	1.79.0

Oracle Linux 8 Application Streams

The following tables lists AppStream packages currently in Oracle Linux 8. As best practice, you should upgrade to the latest release of these packages as possible. Oracle continues to provide support for modules in the AppStream channel until the specified retirement date, as listed in the tables.

Oracle Linux 8 Full Life Application Streams

Where possible, if several shorter-lived Application Streams are offered, a single stream that extends the duration of the underlying Oracle Linux release might also be offered.

Table 1-3 Oracle Linux 8 Full Life Application Streams Release Life Cycle

Module	Stream	Release Date	Retirement Date	Release
ant	ant 1.10	July 2019	July 2029	8.0

Table 1-3 (Cont.) Oracle Linux 8 Full Life Application Streams Release Life Cycle

Module	Stream	Release Date	Retirement Date	Release
Apache Subversion	subversion 1.10	July 2019	July 2029	8.4
git	git 2	July 2019	July 2029	8.0
httpd	httpd 2.4	July 2019	July 2029	8.0
Identity Management	Identity Management Client	July 2019	July 2029	8.0
nginx	nginx 1.24	May 2024	July 2029	8.10
perl	perl 5.26	July 2019	July 2029	8.0
php	php 7.4	November 2020	July 2029	8.3
postgresql	postgresql 12	February 2020	July 2029	8.1
python	python 3.6	July 2019	July 2029	8.0
redis	redis 6	May 2021	July 2029	8.4
ruby	ruby 2.5	July 2019	July 2029	8.0
squid	squid 4	July 2019	July 2029	8.0
virt	ol	July 2019	July 2029	8.0

Oracle Linux 8 Standard Application Streams

New versions of most Application Streams become available, as needed, during the Oracle Linux life cycle. Life cycles align to the upstream support life or to product needs as required. Several versions of the same Application Stream might be available at the same time with overlapping support durations.

Table 1-4 Oracle Linux 8 Application Stream Life Cycle

Module	Stream	Release Date	Retirement Date	Release
N/A	ansible-core	May 2022	November 2023	8.6
Apache Subversion	subversion 1.14	May 2021	May 2024	8.4
authd	authd 1.4.4	July 2019	May 2021	8.0

Oracle Linux 8 Rolling Application Streams

Rolling application streams are supported for the full life of the Oracle Linux 8 release. New versions of the streams replace existing versions in update releases. Rolling streams are only used when having new versions of the stream is very important. Users of rolling streams should understand when and how the streams are updated and be prepared for newer versions.

Rolling Application Stream	Release Date	Version
Gnu Make (Last version)	November 2022	018
Go	May 2022	1.20.10
Java Mission Control	November 2021	8.0.1
LLVM	May 2022	16.0.6
Rust	May 2022	1.71

Oracle Linux 8 Dependent Application Streams

Dependent application streams are only supported while used by other "Full Life", "Rolling" or "Standard" application streams and not as standalone packages.

Table 1-5 Dependent Application Streams

Application Stream
389-ds 1.4
pki-core
pki-deps

2

Oracle Cloud Native Environment

Oracle Cloud Native Environment releases are supported for CVE and bug fixes based on a time period following each release of the product. Support periods are based the major and minor release numbers (for example 1.7, 2.0), not on the patch releases (for example: 1.7.5 or 2.0.1, and so on).

For more information about Oracle Cloud Native Environment, see [Oracle Cloud Native Environment documentation](#).

Table 2-1 Oracle Cloud Native Environment Support Schedules

Description	Full Support (0-4 months)	Maintenance Support 1 (4-8 months)	Maintenance Support 2 (8-16 months)
Qualified Security Fixes Critical (C) and Important (I)	C, I	C, I	C
Bug fix by severity Critical (C) and Important (I)	C, I	C	No
Security Announcements	Yes	Yes	Yes
Bug Fix Errata Announcements	Yes	Yes	No

3

Oracle Linux Automation Manager

Oracle Linux Automation Manager releases are supported for CVE and bug fixes based on a time period following each release of the product. Support periods are based the major release numbers (for example 1 and 2), not on the minor or patch releases (for example: 1.0.1 or 2.1, and so on).

For more information about Oracle Linux Automation Manager, see [Oracle Linux Automation Manager documentation](#).

Table 3-1 Oracle Linux Automation Manager Support Schedules

Description	Full Support (0-6 months)	Maintenance Support 1 (6-12 months)	Maintenance Support 2 (12-18 months)
Qualified Security Fixes Critical (C) and Important (I)	C, I	C, I	C
Bug fix by severity Critical (C) and Important (I)	C, I	C	No
Security Announcements	Yes	Yes	Yes
Bug Fix Errata Announcements	Yes	Yes	No
Select Software Enhancements	Yes	No	No

4

Oracle Linux Virtualization Manager

Oracle Linux Virtualization Manager receives CVE and bug fix updates for the current and the previous major and minor releases (N and N-1). A release that's at N-1 receives CVE and bug fix updates for a 6 month period following the N release date. Updates are based on the major and minor release numbers (for example 1.0 to 2.0 or 1.3 to 1.4, and so on), not on the patch releases (for example: 1.2.1 or 1.2.2, and so on).

For more information about Oracle Linux Virtualization Manager, see [Oracle Linux Virtualization Manager documentation](#).

Table 4-1 Oracle Linux Virtualization Manager CVE and Bug Fix Updates

Oracle Linux Virtualization Manager	Release Date	CVE and Bug Fix Updates
Release 4.5 (N)	December 2023	Yes
Release 4.4 (N-1)	April 2022	Available until July 2024
Release 4.3 (N-2)	April 2020	Ended October 2022
