What's New for Oracle WebCenter Content

Release 12c (12.2.1.1)

E74929-02

July 2016

Topics

- [What's New for Oracle WebCenter Content](#)
- [What's New for Oracle WebCenter Enterprise Capture](#)
- [What's New for Oracle WebCenter Application Adapters](#)

What's New for Oracle WebCenter Content

This section introduces the new features and enhancements of Oracle WebCenter Content.

12c (12.2.1.1) — June 2016

Feature	Description
Trash	In the WebCenter Content UI, deleting items sends them to the Trash folder instead of being permanently deleted. See Deleting Libraries, Folders, and Documents .
Hybrid Enterprise Content Management (HECM)	In the WebCenter Content UI, you can integrate Oracle WebCenter Content with Oracle Documents Cloud Service to share, copy, and upload content to the cloud server and maintain an easy access to content on the go. See Working with Oracle Documents Cloud Service .
Scan	The process of uploading documents through a scanner has changed in this release. See Uploading Documents from a Web Browser .
Upgrading Inbound Refinery	You can upgrade older versions of the Inbound Refinery (IBR) to the current release. Earlier, newer versions of Inbound Refinery had to be installed instead of being upgraded.

What's New for Oracle WebCenter Enterprise Capture

This section introduces the new features and enhancements of Oracle WebCenter Enterprise Capture.

12c (12.2.1.1) — June 2016

Feature	Description
Oracle Documents Cloud Service (DOCS) commit driver	Use the Oracle Documents Cloud Service commit driver to commit documents from Capture to DOCS. See Configuring an Oracle Documents Cloud Service Commit Profile.
Enhancement of DOCS commit driver to support DOCS metadata	Ability to create metadata collections and optionally include selected system fields to metadata collections. See Configuring an Oracle Documents Cloud Service Commit Profile.
Recognition Processor support on all certified operating system platforms.	Recognition Processor support on all certified operating system platforms with the introduction of the Universal Decoder bar code engine. See Managing Recognition Processing.
Capturing and use of TWAIN related metadata	Ability to control and receive the scanner's imprinter/endorser string and the ability to retrieve bar codes, patch codes, and MICR values recognized by the scanner. See ImageCaptureEngine.
Updates to File Information window in the Capture client	Addition of Endorsement and MICR properties to the File Information window in the Capture client. See How do I view file information?

What's New for Oracle WebCenter Application Adapters

This section introduces the new features and enhancements of Oracle WebCenter Application Adapters.

12c (12.2.1.1) — June 2016

Feature	Description
Content Server Web Services for Managed Attachments	Enables to remove Application Extension Framework (AXF) dependency on Managed Attachments. It includes: <ul style="list-style-type: none">• Setting up communication with 12c Content Server. See Configuring Communication with a 12c Server.• Configuring elements for Managed Attachments. See Configuring 12c Elements for Managed Attachments.

Feature	Description
Customize Managed Attachments settings based on the E-Business Suite responsibilities	Ability to customize Managed Attachments settings based on the E-Business Suite responsibilities. See Customizing Settings Based on Users' Assigned Responsibility ID.
